Artificial Intelligence (AI) and Finance Bahaaeddin A. M. Alareeni,Islam Elgedawy,2023-08-26 Artificial intelligence AI has the potential to significantly improve efficiency reduce costs and increase the speed and accuracy of financial decision making making it an increasingly important tool for financial professionals One way that AI can improve efficiency in finance is by automating tasks and processes that are time consuming and repetitive for humans For example AI algorithms can be used to analyze and process large amounts of data such as financial statements and market data in a fraction of the time that it would take a human to do so This can allow financial professionals to focus on higher value tasks such as interpreting data and making strategic decisions rather than being bogged down by mundane tasks AI can also reduce costs in finance by increasing automation and eliminating the need for certain tasks to be performed manually This can result in cost savings for financial institutions which can then be passed on to customers in the form of lower fees or better services AI can be used to identify unusual patterns of activity that may indicate fraudulent behavior This can help financial institutions reduce losses from fraud and improve customer security AI powered chatbots and virtual assistants can help financial institutions provide faster more efficient customer service particularly when it comes to answering common questions and handling routine tasks Some financial institutions are using AI to analyze market data and make trades in real time AI powered trading algorithms can potentially make faster and more accurate trading decisions than humans In terms of speed and accuracy AI algorithms can analyze data and make decisions much faster than humans and can do so with a high degree of accuracy This can be particularly useful in fast moving financial markets where quick and accurate decision making can be the difference between success and failure This book highlights how AI in finance can improve efficiency reduce costs and increase the speed and accuracy of financial decision making Moreover the book also focuses on how to ensure the responsible and ethical use of AI in finance This book is a valuable resource for students scholars academicians researchers professionals executives government agencies and policymakers interested in exploring the role of artificial intelligence AI in finance Its goal is to provide a comprehensive overview of the latest research and knowledge in this area and to stimulate further inquiry and exploration *Quality in African Higher Education* ,2025-05-19 This book examines quality higher education as a stimulus for sustainable development in selected regions of Africa Its underlying principle flaunts quality higher education as

Access, Quality, and the Global Learning Crisis Sarah Kabay, 2021-08-26 Around the world 250 million children cannot read write or perform basic mathematics They represent almost 40% of all primary school aged children This situation has come to be called the global learning crisis and it is one of the most critical challenges facing the world today Work to address this situation depends on how it is understood Typically the global learning crisis and efforts to improve primary education are defined in relation to two terms access and quality This book is focused on the connection between them Through a mixed methods case study it provides detailed contextualized analysis of Ugandan primary education As one of the first countries in Sub Saharan Africa to enact dramatic and far reaching primary education policy Uganda serves as a compelling case study With both quantitative and qualitative data from over 400 Ugandan schools and communities the book analyzes grade repetition private primary schools and school fees viewing each issue as an illustration of the connection between access to education and education quality This analysis finds evidence of a positive association challenging a key assumption that there is a trade off or disconnect between efforts to improve access to education and efforts to improve education quality Embracing the complexity of education systems and focusing on dynamics where improvements in access and quality can be mutually reinforcing can be a new approach for improving basic education in different contexts around the world

The Politics of Revenue Bargaining in Africa Anne Mette Kjær, Marianne S. Ulriksen, Ane Karoline Bak, 2023-11-30 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Academic and offered as a free PDF download from OUP and selected open access locations This book examines the politics of revenue bargaining in Africa at a time when attention to domestic revenue mobilization has expanded immensely Measures to increase taxes and other revenues can but do not always lead to a process of bargaining where revenue providers negotiate for some kind of return This book offers in depth analyses of micro instances of revenue bargaining across five African countries Mozambique Senegal Tanzania Togo and Uganda The case studies all draw on a common theoretical framework combining the fiscal contract theory with the political settlement approach which enables a systematic exploration into what triggers revenue bargaining how these processes unfold and

finally if and when they result in an agreement whether that is a fiscal contract or not From these empirically rich case narratives emerges a story of how power and initial bargaining position influence not only whether bargaining occurs in the first place but also the processes and their outcomes Less resourceful taxpayers find it harder to raise their voice but in some cases even these groups manage to ally with other civil society groups to protest tax reforms they perceive as unfair Indirect taxes such as VAT often trigger protests as do sudden changes in tax practices Revenue providers rarely call for improved services in return for paying tax which would be expected to nurture the foundation for a fiscal social contract Instead revenue providers are more likely to negotiate for tax reductions implying that governments efforts to increase revenue are impeded Indeed we find many instances of state society reciprocity when ruling elites try to be responsive to revenue providers demands The Politics of Revenue Bargaining in Africa hence provides insights into the nature and dynamics not only of revenue bargaining but of policymaking in general as well as its implications for state society reciprocity in Africa

Why Regional Tier Form of Decentralization Governance's Implementation Is a Preliquist for Uganda's Better Service Delivery of 21st Century Deo Rwangoga, The book looks at Decentralization governance of president Museveni era that was registered in Uganda of the local government status 1987 resistance councils status 1993 as well as into the 1995 constitution operationalized by the local government act 1997 that devolved legislative fiscal planning budgeting functions to districts Municipal councils as well as their lower tier levels whose idea was to involve the people in a way they were governed the dream that have not been achieved looking at what the cries of people are as expressed in all sectors This book analyses Decentralization from 1997 to 2019 and deduces that the first phrase of it 10 years that is up to 2005 was a success that time the district were 69 in number but beyond that time it was not at all and up to now as it is continuously becoming harder to manage those very many administrative units that jumped from just 39 districts in 1991 to 134 Districts in 2020 as well as municipalities created alongside districts that now stand at 41 2018 all contributing to formation of a Member of Parliament that total to 459 MPs 2018 All this has led Uganda to have a very poor

governance system as even primary sectors of health education agriculture and economy are in a dilemma state leave alone local revenue collections that are directed from source to Centre before expenditure and the districts have to request back to do any activity including emergencies like garbage management repairs and salaries making services delivery impossible to be efficient and effective in all ways at these levels The book is based on secondary data that reported on governance issues of the day as written in Ugandan media that were people s feelings as issues of the time as well some Journals observations and interviews The book introduces decentralization governance of Uganda identifies current state of affairs of service delivery presents why there was need for many new administrative units and their state now looks at history of parliament feudalism identifies lost pride of Ugandans proposes what regional tier governance can address as well as linking the past with today s Ugandan governance Finally the book proposes prerequisite regional tier power centres relevant to today s Uganda and concludes with models that can help us achieve vision 2040 and therefore proposes immediate need to implement regional tier governance that will establish all three arms of government at regional centres of Uganda remember it was agreed to be implemented by those that deemed it under article 178 3 It is apparent that all regions should therefore implement it as a solution to service delivery that is very poor now
