Postgraduate Research Engagement in Low Resource Settings Atibuni, Dennis Zami, 2019-09-27 The general academic progression and particularly research engagement of postgraduate students is characterized by various problems such as high dropout rates, longer completion times, low graduation rates and high repetition or retake rates. This means that there are far fewer students pursuing postgraduate studies at tertiary institutions and universities than there are at the lower levels of education. Yet there is growing demand for postgraduate education given its strong projected association with socioeconomic transformation at national and international levels among developed and developing countries alike. *Postgraduate Research Engagement in Low Resource Settings* sets out to garner strategies for fostering efficiency of research conduct among the students and faculty so as to enhance high quality output for the envisaged personal, societal, national and international socioeconomic transformation. Covering a range of topics such as intellectual property, mental health and quality assurance, this book is ideal for research supervisors, higher education faculty, librarians, educators, administrators, researchers, academicians and students.

The Politics of Inclusive Development Sam Hickey, Kunal Sen, Badru Bukenya, 2014-12-11 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. It

is now widely accepted that politics plays a significant role in shaping the possibilities for inclusive development. However, the specific ways in which this happens across different types and forms of development and in different contexts remains poorly understood. This collection provides a state of the art review regarding what is currently known about the politics of inclusive development. Leading academics offer systematic reviews of how politics shapes development across multiple dimensions including through growth, natural resource governance, poverty reduction, service delivery, social protection, justice systems, the empowerment of marginalised groups and the role of both traditional and non traditional donors. The volume not only provides a comprehensive update but also a ground breaking range of new directions for thinking and acting around these issues. The book's originality thus derives not only from the wide scope of its case study material but also from the new conceptual approaches it offers for thinking about the politics of inclusive development and the innovative and practical suggestions for donors, policy makers and practitioners that flow from this.

The Politics of Education in Developing Countries Samuel Hickey, Naomi Hossain, 2019. This book focuses on how politics shapes the capacity and commitment of elites to tackle the learning crisis in six developing countries. It deploys a new conceptual framework to show how the type of political settlement shapes the level of elite commitment and state capacity to improving learning outcomes.
