

KBD300A Keyboard

FULL-FUNCTIONALITY, FIXED/VARIABLE SPEED, PTZ CONTROL

Product Features

- Keyboard-to-Cameras:
 - CM6700/CM6800/CM6700-SAT/CM6700 Matrix Switchers
 - DSE100 Series Digital Video Recorder
 - Genex® Multiplexer (When Used with CM6700 and CM6800)
 - Up to 16 Receivers Directly from Keyboard (such as Spectra®, ExStar®, and ExStar®)
- Automatic Recognition of CM6700/CM6800 and Direct-F Modes
- Joystick Control of PTZ Functions
- Pre-set Position and Pattern Control

The **KBD300A** keyboard is a full-function, desktop keyboard controller that can be used in a variety of applications.

A barrel-type joystick provides precise pan and tilt control of fixed speed and variable speed receivers. Twisting the joystick clockwise or counter-clockwise zooms the lens in or out.

Keys select cameras and monitors, operate presets, patterns, positions, and sequences, open and close the iris, zoom and focus the lens, and start and stop auto, frame, and random scanning.

The keyboard can be used in six modes of operation: CM6700/CM6800/CM6700-SAT Mode, Direct-F, Direct-D, CM6700 ASCS, CM6800 ASCS/CM6700, and CM6700-MQA. The **KBD300A** keyboard automatically recognizes CM6700/CM6800 and Direct-F modes. The **KBD300A** must be operated in CM6700 ASCS mode when used with the DM4500/DM4000 Series DPs and the Digital Sentry® DS-ControlPoint server or remote client. The **KBD300A** keyboard must run firmware 5.0 or later to operate in CM6700 ASCS mode.

In the first two modes, the keyboard is plugged into a CM6700, CM6800, or CM6700-SAT switch/keyboard controller with SCU and is used to properly and operate the SCU. The maximum number of keyboards per unit is eight (CM6700 and CM6800-SCAS), sixteen (CM6800-SCAS, CM6800-4000, and CM6800-06010), or four (CM6700-SAT). In CM6700/CM6800 applications, the keyboard can control cameras connected directly to the SCU or through an MX4000 Series Genex® multiplexer.

If you do not need all the features of the CM6700/CM6800-SCS but want the same keyboard functionality, then one keyboard can be wired directly to camera receivers in Direct-F or Direct-D mode. KBD-RCT is required.

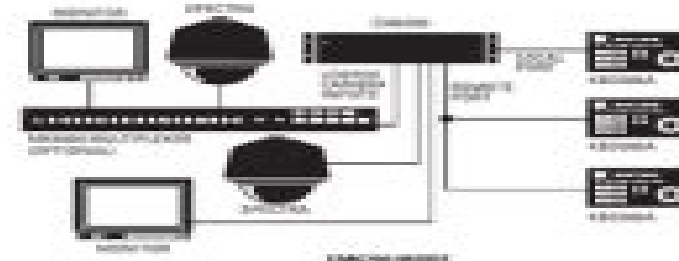

- Auxiliary Operation
- Auto/Random/Frame Scanning
- Programming of CM6700/CM6800/CM6700-SAT/CM6700-MQA

Up to 16 receivers can be wired to a keyboard; however, a switcher such as an MS500 or MS6100 is required to route video to the monitor. Direct-F or Direct-D mode uses 2-wire control of receivers using Pelco P or Pelco D protocols.

The **KBD300A** keyboard can also be used for on-screen programming of the CM6700-MQA master distribution amplifier.

When used with the CM6700-DMF data manager, up to four **KBD300A** keyboards can be used to control a single Pelco P or Pelco D protocol device such as a Spectra® dome or an ExStar®/ExStar® positioning system.

The optional KBD000U/000T is required to connect the KBD300A keyboard to the DM4500/DM4000. The KBD000U/000T is also required to control certain functions of DS-ControlPoint software.
