Engineering Laboratory,1973      United States Army X-ray Manual ,1920      United States Army X-ray Manual Authorized  
by the Surgeon-General of the Army United States. Surgeon-General's Office,1918      A Manual of X-Ray Technic (Classic  
Reprint) Arthur C. Christie,2015-09-27 Excerpt from A Manual of X Ray Technic This short manual on the technic of X ray  
examination has been prepared with a view to the needs of the medical service of the United States Army The small number  
of medical officers in the service necessitates frequent change of station so that it often becomes necessary for one to  
familiarize himself in a comparatively short time with the essentials of radiologic technic With this in mind it has been the  
author s aim to limit this work to the absolute essentials a knowledge of which will enable the operator to do satisfactory  
work in X ray diagnosis The book may also be found useful by that increasingly large number of physicians and surgeons in  
private practice who find it necessary or expedient to do their own X ray work for diagnosis Resort to a specialist in radiology  
is earnestly recommended whenever such services can be obtained but in the smaller cities and towns this is often impossible  
It is believed that mastery of the facts contained in this manual will enable those so situated to do satisfactory radiography In  
the preparation of this book many of the larger text books and many monographs have been freely drawn upon About the

Authorized by the Surgeon General of the Army Prepared Under the Direction of the Division of Roentgenology There is of  
course no clear line of demarcation between military roentgenology and roentgenology of civil practice It is the same art but

practiced under different circumstances and sometimes with an entirely different type of apparatus. The principal aim in the preparation of this manual and in the courses of instruction carried on by the Medical Department has been to familiarize the already experienced roentgenologist with the apparatus with which he is to work and to give him additional instruction along any lines in which he may be deficient. The need for a large number of roentgenologists however has rendered it necessary to train for this work physicians who have had little or no previous experience and for this reason it has been necessary to cover in the manual practically all phases of roentgenology.
