Improving Secondary Science Teaching John Parkinson, 2003-12-16 *Improving Secondary Science Teaching* has been written to help teachers both new and experienced reflect on their current practice and consider how to improve the effectiveness of their teaching. The book examines each of the common teaching methods used in science in relation to pupils learning and provides guidance on management issues and procedures. With underlying themes such as pupils' interest in science and their motivation to learn how pupils learn science, the type of science currently being taught in school and the value of educational research, the book includes chapters on the improvement process, planning for progression and continuity, promoting pupils' learning, dealing with differences, making use of information from assessment, learning about the nature of science. This timely book will be of interest to practising science teachers, particularly those who are working to improve the management of science departments or their own teaching practice. It will also be a valuable resource for science education researchers and students on higher degree courses in science education.

Using Effectiveness Data for School Improvement Anthony Kelly, Christopher Downey, 2010-12-13 This book lifts the lid on a range of data gathering techniques and methods and reveals the provenance and shortcomings of education data collection and utilisation.

The EAL Teaching book Jean Conteh, 2015-10-31 As the number of children for whom English is an Additional Language in schools increases, how do teachers and trainees prepare to support them to succeed? This text is their toolkit. A complete guide to understanding learning from and teaching bilingual and EAL children in schools. The text begins by asking who are EAL learners and challenges some of the misconceptions about this group. It goes on to examine language in depth, providing focused theory to help teachers and trainees better understand the wider context of children's needs. This theory is supported by a wealth of information on practical teaching strategies and resources in the promoting learning section. The text covers planning across the curriculum for EAL, assessing EAL and bilingual learners and classroom organisation, offering day to day practical support for teachers. New to this second edition is a chapter on Using home languages and cultures in learning as well as many new case studies from practising teachers offering insight and knowledge on teaching this particular group.

The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and gripping novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
