Abraham, A. Thomas, 2013-06-29 The origin of this work is to be found in the cyclostyled course on The optimal allocation of resources in the firm and in the Nation taught by Mr Boiteux at the Centre d Etudes des Programmes Economiques C E P E Paris from 1957 to 1960 Of course several successive later rewritings and a great many additions have profoundly altered the initial version starting from a remarkably clear and concise exposition of economic theory we have ended with a book that is several hundred pages long It is not at all certain that Mr Boiteux would recognise this intellectual sponsorship Nor is it certain that the gain in information justifies such an increase in size However that may be the initial plan has survived Without Mr Boiteux this book would never have been undertaken it is a pleasant duty for us respectfully to acknowledge our debt to him here Microeconomic analysis that is to say that analysis which results from the study of the behaviour and activities of individual decision units was for a long time the main concern of the neo classicists Quite recently the introduction of macroeconomic theory dealing with aggregate quantities seemed to relegate it to second place But this is not where it belongs we tend to agree with Mr Raymond Barre that there are two different scales of analysis that complement rather than contrast with one another      *Managerial Economics in a Global Economy* Dominick Salvatore, 2004 This text uses the theory of the firm as the unifying theme to examine the managerial decision process It introduces a global view into managerial economics to reflect the internationalization of tastes production

and distribution in the globalizing world and goes on to introduce many topics and managerial tools into the study of managerial economics such as firm architecture strategic behaviour business ethics electronic commerce risk management international economies of scale the virtual corporation re engineering benchmarking the learning organization and the digital factory The book shows how managerial decisions are actually made with relevant real world case applications and integrative case studies      The Cumulative Book Index ,1999
