## **Kontrol I Det Stille:**

Knowledge and Power in Collaborative Research Louise Phillips, Marianne Kristiansen, Marja Vehviläinen, Ewa Gunnarsson, 2013-05-02 Collaborative research embraces a multiplicity of practices in which social actors are invited to participate in the research process as co producers of knowledge But what is actually meant by co production in collaborative research Knowledge and Power in Collaborative Research presents a range of critical reflexive strategies for understanding and tackling the challenges emanating from the tensions that arise in the meeting between different participants knowledge forms and knowledge interests The chapters anchor discussion of ethical epistemological and methodological questions in sustained empirical analyses of cases of collaborative knowledge production The book covers diverse theoretical approaches such as dialogic communication theory actor network theory poststructuralist writing as inquiry institutional ethnography dialogic action research and pragmatic action research The empirical cases span a broad spectrum of empirical fields of social practice health services organisational change research science communication environmental communication in intermediary NGOs participatory governance in relation to urban planning and digital communication and virtual worlds

**Structural Equation Modeling in Educational Research**, 2009-01-01 Over the years researchers have developed statistical methods to help them investigate and interpret issues of interest in many discipline areas These methods range from descriptive to inferential to multivariate statistics As the psychometrics measures in education become more complex vigorous and robust methods were needed in order to represent research data efficiently One such method is Structural Equation Modeling SEM SEM is a statistical technique that allows the simultaneous analysis of a series of structural equations It also allows a dependent variable in one equation to become an independent variable in another equation It is a comprehensive statistical approach to testing hypotheses about relations among observed and latent variables SEM is commonly known as causal modeling or path analysis which hypothesizes causal relationships among variables and tests the causal models with a linear equation system As educational research questions become more complex they need to be evaluated with more sophisticated tools The pervasive use of SEM in the literature has shown that SEM has a potential to be of assistance to modern educational researchers This book will bring together prominent educators and researchers from around the world to share their contemporary research on structural equation modeling in educational settings The chapters provide information on recent trends and developments and effective applications of the different models to answer various educational research questions This book is a critical and specialized source that describes recent advances in SEM in international academia

**Transformative Leadership and Educational Excellence**, 2009-01-01 On records the evolution of human development pays a considerable tribute to the relentless efforts made by generations of teacher educators set out to train academic leaders and teachers committed to the implementation of educational policies parallel to the mental edification of young students Teacher educators faced the challenges overcame the obstacles and

refined the pedagogies of our educational system with many innovative approaches As the world faces increasing uncertainties and adamant shifts of knowledge economy it is apparent that education plays an ultimate role in creating adept and geared up citizens to lead the way to the future Designing and managing learning school organizations that can sustain a competitive advantage in this fast changing environment demands transformative leaders primed and ready to the building or our intellectual capital for the future Many books on teacher education educational management and leadership have been written in the past but most of them do not keep up with the fast changing educational scene and only a few include future scenarios This book presents the anticipated trends and demands of the new knowledge economy and it aims to achieve its goals with the use of various tools generative and collaborative efforts increasing leadership capability in dynamic and complex contexts enculturation of cutting edge knowledge for educational advancement and creation of teams that focus learning organizations This book brings together prominent and leading teacher educators and researchers from around the world to present their scholarship theories and practice case studies state of the art approaches and upshot predictions This book embodies collective knowledge inquiry and represents professional conversations The chapters provides information on recent trends and development in teacher education the important role of educational management and leadership in educational transformations and promising practices for desired outcomes The book is a critical and specialized resource that describes how transformative leadership can play an important role in achieving excellence in education The topics covered are Educational Leadership and Effective Teaching Research in Transformational Leadership and Professional Development and Social Capital Building in Schools

**Cultural Analysis** Hans Gullestrup,2006 With internationalization the world is becoming smaller and the opportunity to meet people from other countries and cultures is becoming more common providing the need for cooperation shared knowledge and cross border trade Individual cultures tend to understand themselves best and base their understanding of the world and its peoples on ideas they each have come to believe irrespective of reality and thus make it difficult to reach a proper understanding of other cultures This book considers intercultural understanding and co action partly by means of general insights into the concept of culture and the dimensions which bring about cultural differences and partly as a methodology to analyze a certain culture whether one s own or others This leads towards an understanding of cultural complexity and cultural differences among people The book provides a discussion of a number of ethical issues which almost invariably will arise when people meet and co act across cultural boundaries Cultural Analysis offers a theoretical abstract proposal for cultural understanding intercultural plurality and complexity

*Deontology, Responsibility, and Equality* Kasper Lippert-Rasmussen,2005 Three questions that loom large in moral and political philosophy are these Can deontological moral constraints be justified When if ever are we morally responsible for what we do How is the ideal of equality best configured Deontology Responsibility and Equality deals with selected aspects of these three broad questions It critically discusses certain attempts by Frances Kamm and Thomas Nagel

among others to account for the impermissibility of minimizing violations in terms of moral status Also it challenges the view that there is a morally relevant difference between doing and allowing harm and especially between killing and letting die In relation to the second question it concentrates on recent developments within compatibilist accounts of moral responsibility prompted by the work of Harry Frankfurt It challenges his purported refutation of the principle of alternative possibilities as well as certain positive compatibilist identification based accounts of respon *Relational Perspectives on Leading Mette Vinther Larsen,2015-06-09* Relational Perspectives on Leading discusses leadership from a relational and social constructionism perspective as practiced on an everyday basis between people The book pursues a fast growing practice based approach particularly within the Anglo Saxon parts of the world to organization studies and organizational phenomena

*Evaluating Development Assistance in Theory and in Practice* Claus C. Rebien,1996 This study looks at the assistance given to better the living conditions of peoples in developing countries and looks towards improving this aid and its evaluation *The Northern Lights* Barbara Czarniawska-Joerges,Guje Sevón,2003 **Tidsskrift for den Norske lægeforening** ,1913 *Beyond Structure and Rationality* Jan Molin,1987 The occasion for the project was the change in the

administration of the handicapped within the public sector and the objective of the research process was to monitor the organizational response to this mandatory change in task The project was intended to be a process of action research that included two aspects first of all an intensive comparative analysis of four public organizations facing the new task of administrating the handicapped and secondly to create a participatory scheme of organizational change in one of the four public organizations After discussing the data in the research group and after analyzing the pictures of the four organizations that emerged from the analysis we were astonished to find that among the four departments there were no less than three very different organizational responses to the new task of administrating the handicapped clients Moving Mountains

Marie H. Roesgaard,1998 The Japanese educational system is admired and envied for its success in providing a well educated population and contributing to the spectacular post War industrialisation and modernisation of the nation It is also criticised for inhibiting creativity and spontaneity seen as crucial talents in the forthcoming information age Moving Mountains is based on two propositions that the educational system is undergoing a number of changes despite charges to the contrary and that there is a conflict between the rhetoric of the National Council on Education Reform undertaken by Prime Minister Nakasone 1982 1987 and its emphasis on issues like internationalism vis vis the national and economic needs as defined by the politicians *Den Norske sindssygeret historisk fremstillet* Paul Winge,1916 **Skrifter udgivne af**
