disruptors EDs are substances that adversely affect hormone function The effects by EDs are thought to depend on both dose
and timing of exposure especially during foetal development The upcoming EU regulation on identification of EDs application
biocides and pesticides will have an impact on all actors of the food chain The consequences of a ban of EDs in foods were
discussed in a Nordic workshop Uppsala 29 30 Nov 2016 where risk assessors and managers from Nordic food authorities
industry trade associations consumer organizations and researchers were represented It was recognized by all participants
that a ban was particularly challenging for the production chain since there are few viable alternatives A harmonized EU
legislation based on scientific risk assessment was preferred compared to national specific legislation as it treats all the
