Transgenic Animal Technology Carl A. Pinkert, 2014-06-17 Transgenic animal technologies and the ability to introduce functional genes into animals have revolutionized our ability to address complex biomedical and biological questions This well illustrated handbook covers the technical aspects of gene transfer from molecular methods to whole animal considerations for important laboratory and domestic animal species It describes methodologies as employed by leading laboratories and is a key resource for researchers as well as a tool for training technicians and students This second edition incorporates updates on a variety of genetic engineering technologies ranging from microinjection and ES cell transfer to nuclear transfer in a broad range of animal modeling systems Contains a comprehensive collection of transgenic animal and gene transfer methods Discusses background and introduction to techniques and animal systems Teaches practical step by step protocols Fully revised with updates to reflect state of the art technology and associated changes to date

Methodological Advances in the Culture, Manipulation and Utilization of Embryonic Stem Cells for Basic and Practical Applications Craig Atwood, 2011-04-26 Pluripotent stem cells have the potential to revolutionise medicine providing treatment options for a wide range of diseases and conditions that currently lack therapies or cures This book describes methodological advances in the culture and manipulation of embryonic stem cells that will serve to bring this promise to practice

Systematic Approach to Evaluation of Mouse Mutations John P. Sundberg, 1999-07-23 Experts from The Jackson Laboratory and around the world provide practical advice on everything from how to establish a colony to where to go for specific mutations The book includes information on medical photography grafting procedures and how to map the genes and evaluate the special biological characteristics of mice It also discusses how to maintain a colony of mice that breed with difficulty how to approach mapping spontaneous mutations how to set up systems to evaluate a specific antibody how to perform simple measurements that yield a large amount of information and how to access mouse informatics on the Web
