Marfield & Robbier: Ch 2: Ethics and Criminal Justice Research

- Introduction
 - Some scientifically “perfect” designs are not realistic in regard to cost or the amount of time they’ll take to complete
 - Sometimes blinded to ethical considerations due to being human
- Ethical Issues in Criminal Justice Research
 - **Ethical** – conforming to the standards of conduct of a given profession or group
 - A matter of agreement among a group
 - Research questions typically address illegal behavior, so many ethical issues arise
 - No Harm to Participants
 - CJ research can produce embarrassment, physical harm, and/or psychological harm
 - Collecting info from those who have engaged in criminal activity
 - Research staff may be put at risk
 - Three groups at potential risk for physical harm
 - Research subjects
 - Researchers
 - Can trigger attacks on themselves if they interview subjects with a violent history
 - Third parties
 - Ex. Researchers learn that subjects intend to harm a third party
 - Should researchers maintain confidentiality or intervene to prevent harm?
 - Asking victims about their experience may be traumatic (psych)
 - Use of computerized survey can maintain privacy and prevent harm
 - Crime mapping poses a threat to privacy of victims
 - ** Possible harm to subjects may be justified if the potential benefits outweigh the harm.
 - Voluntary Participation
 - No one should be forced to participate in research.
 - Participation may not be entirely voluntary
 - Despite being told otherwise, participants are motivated by the belief that they will personally benefit from participation
 - ex. Prisoners being asked to participate after being told that they won’t receive any special reward
 - People may participate solely for some reward
 - Students may answer a questionnaire because they fear not doing so will jeopardize their grade
 - Results may not be generalizable if only those who want to participate, participate
