McNair, Juvia P. Heuchert, 2012 The POMS2 instruments assess the mood states of individuals 13 years of age and older A revision of the Profile of Mood States the self report scales are a collection of tools that allow for the quick assessment of transient fluctuating feelings and enduring affect states The tool is applicable in clinical medical research and athletic settings where its sensitivity to change makes the assessment ideal for treatment monitoring and evaluation as well as clinical trials **Handbook of Emotion Elicitation and Assessment** James A. Coan, John J.B. Allen, 2007-04-19 Emotion research has become a mature branch of psychology with its own standardized measures induction procedures data analysis challenges and sub disciplines During the last decade a number of books addressing major questions in the study of emotion have been published in response to a rapidly increasing demand that has been fueled by an increasing number of psychologists whose research either focus on or involve the study of emotion Very few of these books however have presented an explicit discussion of the tools for conducting research despite the facts that the study of emotion frequently requires highly specialized procedures instruments and coding strategies and that the field has reached a place where a large number of excellent elicitation procedures and assessment instruments have been developed and validated Emotion Elicitation and Assessment corrects this oversight in the literature by organizing and detailing all the major approaches and instruments for the study of emotion It is the most complete reference for methods and resources in the field and will serve as a pragmatic resource for emotion researchers by providing easy access to a host of scales stimuli coding systems assessment tools and innovative methodologies This handbook will help to advance research in emotion by encouraging researchers to take greater advantage of standard and well researched approaches which will

increase both the productivity in the field and the speed and accuracy with which research can be communicated
