Process Based Unification for Multi-model Software Process Improvement Z.D. Kelemen, 2013-01-30 Many different quality approaches are available in the software industry Some of the approaches such as ISO 9001 are not software specific i.e. they define general requirements for an organization and they can be used at any company Others such as Automotive SPICE have been derived from a software specific approach and can be used for improving specific in this case automotive processes Some are created to improve development processes e.g. CMMI for Development others focus on services e.g. CMMI for Services and again others are related to particular processes such as software testing e.g. TMMi or resource management e.g. People CMM A number of differences among quality approaches exist and there can be various situations in which the usage of multiple approaches is required e.g. to strengthen a particular process with multiple quality approaches or to reach certification of the compliance to a number of standards First of all it has to be decided which approaches have potential for the organization In many cases one approach does not contain enough information for process implementation Consequently the organization may need to use several approaches and the decision has to be made how the chosen approaches can be used simultaneously This area is called Multi model Software Process Improvement MSPI The simultaneous usage of multiple quality approaches is called the multi model problem In this dissertation we propose a solution for the multi model problem which we call the Process Based Unification PBU framework The PBU framework consists of the PBU concept a PBU process and the PBU result We call PBU concept the mapping of quality approaches to a unified process The PBU concept is operationalized by a PBU process The PBU result includes the resulting unified process and the mapping of quality approaches to the unified process Accordingly we addressed the following research question Does the PBU framework provide a solution
