**Teaching, Coaching and Mentoring Adult Learners** Heather Fehring,Susan Rodrigues,2016-11-03 The challenge for those coaching mentoring supervising or teaching adults is to design and deliver high quality programmes that encompass a blend of teaching and learning approaches and strategies that are constructed for adult learners in multiple educational environments and that cater for the diversity of adult learners needs Adult learners are complex individuals who come to the learning process with a multitude of different experiences Teaching Coaching and Mentoring Adult Learners helps practitioners step up to this challenge by developing the skills needed to share their expertise with adult learners and engage

them in new transformative practices This book also forms a timely contribution to the current period of evolution in adult education where extreme changes in the nature and scope of work and the globalisation of work and life are influencing learning The shift in adult education addressed in this book includes the globalisation of the workforce and the cultural impact on adult tertiary and further education the relationship established between adult educators and adult learners provision of adult education and professional development by private and major multimedia and corporate interests occupations boundaries between professions and between skilled and unskilled work assessing adult learners needs and adapting strategies to meet the perceived needs of adult learners in medicine education psychology and industry designing learning experiences to maximise the processing of complex conceptual knowledge and then transforming the knowledge to fit new learning environments the role of new technologies of learning in adult and vocational learning This book provides research based insight into the expectations and the value of the coach mentor tutor and supervisor roles and combines research with strategic guidance to support the implementation of innovative techniques through case studies strategies and methodologies in teaching and learning in higher education and professional learning Bringing together insights from an expert range of international contributors this text will be invaluable to higher education professionals and those involved in supervising coaching and mentoring in the workforce

**Emergent neural computation from the interaction of different forms of plasticity** Cristina Savin, Matthieu Gilson, Friedemann Zenke, 2016-03-22 From the propagation of neural activity through synapses to the integration of signals in the dendritic arbor and the processes determining action potential generation virtually all aspects of neural processing are plastic This plasticity underlies the remarkable versatility and robustness of cortical circuits it enables the brain to learn regularities in its sensory inputs to remember the past and to recover function after injury While much of the research into learning and memory has focused on forms of Hebbian plasticity at excitatory synapses LTD LTP STDP several other plasticity mechanisms have been characterized experimentally including the plasticity of inhibitory circuits Kullmann 2012 synaptic scaling Turrigiano 2011 and intrinsic plasticity Zhang and Linden 2003 However our current understanding of the computational roles of these plasticity mechanisms remains rudimentary at best While traditionally they are assumed to serve a homeostatic purpose counterbalancing the destabilizing effects of Hebbian learning recent work suggests that they can have a profound impact on circuit function Savin 2010 Vogels 2011 Keck 2012 Hence theoretical investigation into the functional implications of these mechanisms may shed new light on the computational principles at work in neural circuits This Research Topic of Frontiers in Computational Neuroscience aims to bring together recent advances in theoretical modeling of different plasticity mechanisms and of their contributions to circuit function Topics of interest include the computational roles of plasticity of inhibitory circuitry metaplasticity synaptic scaling intrinsic plasticity plasticity within the dendritic arbor and in particular studies on the interplay between homeostatic and Hebbian plasticity and their joint contribution to network function
