**The Medicalization of Birth and Death** Lauren K. Hall, 2019-12-17 Improving how individuals give birth and die in the United States requires reforming the regulatory reimbursement and legal structures that centralize care in hospitals and prevent the growth of community based alternatives In 1900 most Americans gave birth and died at home with minimal medical intervention By contrast most Americans today begin and end their lives in hospitals The medicalization we now see is due in large part to federal and state policies that draw patients away from community based providers such as birth centers and hospice care and toward the most intensive and costliest kinds of care But the evidence suggests that birthing and dying people receive too much even harmful medical intervention In *The Medicalization of Birth*

and Death political scientist Lauren K Hall describes how and why birth and death became medicalized events While hospitalization provides certain benefits she acknowledges it also creates harms limiting patient autonomy driving up costs and causing a cascade of interventions many with serious side effects Tracing the regulatory legal and financial policies that centralize care during birth and death Hall argues that medicalization reduces competition stifles innovation and prevents individuals from accessing the most appropriate care during their most vulnerable moments She also examines the profound implications of policy enforced medicalization on informed consent and shows how medicalization challenges the healthcare community's most foundational ethical commitments Drawing on interviews with medical and nonmedical healthcare providers as well as surveys of patients and their families Hall provides a broad overview of the costs benefits and origins of medicalized birth and death The Medicalization of Birth and Death is required reading for academics patients providers policymakers and anyone else interested in how policy shapes healthcare options and limits patients and providers during life's most profound moments

**Birth Matters** Ina May Gaskin, 2011 A woman who gives birth in the US today is more likely to die in childbirth than her mother was With one in three babies born via cesarean the US ranks behind thirty other nations in neonatal mortality rates and forty other nations in maternal mortality rates Confidence in women's bodies and women's choices has been lost In Birth Matters Ina May Gaskin author of Spiritual Midwifery and Ina May's Guide to Childbirth reminds us that the ways in which women experience birth have implications for us all Renewing confidence in a woman's natural ability to birth provides transformative po

**Parenting for Peace** Marcy Axness, 2012-01-30 If we really want to change the world let's raise a generation hardwired for peace and innovation Marcy Axness details a unique seven step seven principle matrix for helping children achieve self regulation self reflection trust and empathy These qualities are the result of dynamic interactions between genetics and environment beginning before the child is even born foundations for this level of health begin forming during the prenatal period and some aspects of optimal development are influenced as early as conception

**Women's Health** Jillian M. Duquaine-Watson, 2022-02-15 This interdisciplinary project provides an informative accessible and comprehensive introduction to women's health Emphasizing the perspectives of diverse groups of women it addresses various biological economic social environmental and political factors that influence women's health and well being Women are more likely than men to experience mood disorders certain types of cancer Alzheimer's disease stroke arthritis lupus and celiac disease In addition women face significantly more barriers to health care than men due to a variety of social economic political and environmental factors including inequality poverty legislation and pollution Despite this the field of women's and girls health remains both understudied and underfunded Women's Health Understanding Issues and Influences explores important topics in the field of women's health in the early 21st century offering readers a comprehensive and informative yet accessible introduction to women's health in the United States While some topics are unique to women's health others illustrate how women's health and women's experiences within the U S health care system

are different from men's as well as how certain health issues impact women differently than men. Entries have been crafted by a diverse team of contributors with wide-ranging expertise and each entry features a collection of further readings and cross-references to other relevant entries.

**Mother Brain** Chelsea Conaboy, 2022-09-13 Health and science journalist Chelsea Conaboy explodes the concept of maternal instinct and tells a new story about what it means to become a parent. Conaboy expected things to change with the birth of her child. What she didn't expect was how different she would feel. But she would soon discover what was behind this her changing brain. Though Conaboy was prepared for the endless dirty diapers, the sleepless nights, and the joy of holding her newborn, she did not anticipate this shift in self as deep as it was disorienting. *Mother Brain* is a groundbreaking exploration of the parental brain that untangles insidious myths from complicated realities. New parents undergo major structural and functional brain changes driven by hormones and the deluge of stimuli a baby provides. These neurobiological changes help all parents birthing or otherwise adapt in those intense first days and prepare for a long period of learning how to meet their child's needs. Pregnancy produces such significant changes in brain anatomy that researchers can easily sort those who have had one from those who haven't. And all highly involved parents, no matter their path to parenthood, develop similar caregiving circuitry. Yet this emerging science, which provides key insights into the wide-ranging experience of parenthood from its larger role in shaping human nature to the intensity of our individual emotions, is mostly absent from the public conversation about parenthood. The story that exists in the science today is far more meaningful than the idea that mothers spring into being by instinct. Weaving the latest neuroscience and social psychology together with new reporting, Conaboy reveals unexpected upsides, generations of scientific neglect, and a powerful new narrative of parenthood.

**Prepared Childbirth the Family Way**, 2006-10-30 **Birthing from Within** Pam England, Rob Horowitz, 1998 Here is a holistic approach to childbirth that examines this profound rite of passage not as a medical event but as an act of self-discovery. Exercises and activities such as journal writing, meditation, and painting will help mothers analyze their thoughts and face their fears during pregnancy. For use during birth, the book offers proven techniques for coping with labor pain without drugs, a discussion of the doctor or midwife's role, and a look at the father's responsibilities. Childbirth education should also include what to expect after the baby is born. Here are baby basics such as how to bathe a newborn, how to get the little one to sleep, and tips for getting nursing off to a good start. Pregnancy, birth, and postpartum is a process of continuous learning and adjustment. *Birthing From Within* provides the necessary support and education to make each phase of birthing a rewarding experience.

**The Publishers Weekly**, 1972 **The Control of Childbirth** Phyllis L. Brodsky, 2008-03-14 From pre-classical to present times, this work describes childbirth practices as they have developed through the ages. It critiques the evolution of modern midwifery and obstetrics, focusing especially on how, why, and when the process of childbirth became an increasingly sterile, male-dominated and medically oriented event. Provided by publisher.
