SECTION II

RANGE ADJUSTMENTS

A. TOP SECTION - ELECTRIC IGNITION

To operate, push and turn top burner knob to the LITE position. The top burner will light. To turn OFF spark after the top burner has ignited:

1. For ranges with SINGLE purpose valves, turn knob to the right, clockwise to the HI setting, figure 6A.
2. For ranges with HI-SIM-WARM valves, turn knob, either direction to HI setting, figure 6B.

3. There are separate ignition devices for each burner. These ignitors are turned "on" when any knob is turned to the LITE setting. The ignitors will "spark" as long as any of the top burner knobs are at the LITE setting. In case of an electrical power failure, the top burners can still be used. To light a burner, hold a lighted kitchen match adjacent to the top burner to be used and turn valve knob for the burner to LITE. **USE EXTREME CAUTION.** The electric ignitor will not come "on". It is necessary when using the top burners during this type of emergency to light each burner to be used with a kitchen match as describe above each and every time the burner or burners are to be used.

B. OVEN ADJUSTMENTS

1. ELECTRIC IGNITION-BAKE BURNER WITH ELECTRIC GLOW BAR

a. The bake burner is equipped with an electric control system as well as an electric oven burner ignitor. This control system requires NO adjustment. To operate, turn thermostat knob to any temperature setting or to broil. Current will flow to the ignitor. It will "glow" similar to a light bulb. (This glow may be reflected into the oven through the openings in the oven bottom). When the ignitor has reached a temperature sufficient to ignite gas, the electrically controlled oven valve will open and flame will appear at the oven burner. There is a time lapse from 30 to 45 seconds after the thermostat is turned ON before flame appears at the oven burner. When the oven has reached the dial setting, the glowing ignitor will go
