Living With Complexity:

Living with Complexity Donald A. Norman, 2010-10-29 Why we don't really want simplicity and how we can learn to live with complexity If only today's technology were simpler It's the universal lament but it's wrong In this provocative and informative book Don Norman writes that the complexity of our technology must mirror the complexity and richness of our lives It's not complexity that's the problem it's bad design Bad design complicates things unnecessarily and confuses us Good design can tame complexity Norman gives us a crash course in the virtues of complexity Designers have to produce things that tame complexity But we too have to do our part we have to take the time to learn the structure and practice the skills This is how we mastered reading and writing driving a car and playing sports and this is how we can master our complex tools Complexity is good Simplicity is misleading The good life is complex rich and rewarding but only if it is understandable sensible and meaningful

Living with Complexity Donald A. Norman, 2011 **Living with the Unexpected** Anja Possek, 2012-12-06 Living with the Unexpected deals with complexity and uncertainty two major challenges in a world faced with climate change and hazards The study focuses on appropriate methods which enable vulnerable communities to cope effectively with natural hazards and disasters The central goal of the book is an applicable combination of hazard management and development planning Therefore the reconstruction process following a disaster is understood as an opportunity for structural changes and self-organisation processes that foster sustainable development In this context the potential of scenario planning as an evolutionary and participatory learning approach is addressed The empirical research concentrates on the time before and during the volcanic crisis on the Caribbean Island Montserrat Particular methods used are a systematic analysis of the complex system Montserrat more than 200 interviews with stakeholders and citizens concentrating on resource and hazard perceptions as well as the organization and execution of various scenario workshops The study shows that the opportunity to realise sustainable development on the island with the help of a participative adaptive reconstruction process is better than ever The population is sensitised to disasters and an uncertain future Their preparedness to accept measures which are designed to reduce their vulnerability is high This book demonstrates how we can learn to live with the Unexpected
