Journals On Employee Motivation And Job Satisfaction:

The Motivation to Work Frederick Herzberg, Bernard Mausner, Barbara Bloch Snyderman, 2011-12-31 Quality work that fosters job satisfaction and health enjoys top priority in industry all over the world This was not always so Until recently analysis of job attitudes focused primarily on human relations problems within organizations While American industry was trying to solve the unsolvable problem of avoiding interpersonal dissatisfaction problems with the potential for solution such as training and quality production were ignored When first published *The Motivation to Work* challenged the received wisdom by showing that worker fulfillment came from achievement and growth within the job itself In his new introduction Herzberg examines thirty years of motivational research in job related areas Based on workers accounts of real events that have made them feel good or bad on the job the findings of Herzberg and his colleagues have stimulated research and controversy that continue to the present day The authors surprisingly found that while a poor work environment generated discontent improved conditions seldom brought about improved attitudes Instead satisfaction came most often from factors intrinsic to work achievements job recognition and work that was challenging interesting and responsible The evidence marshaled by this volume called into question many previous assumptions about job satisfaction and worker motivation Feelings about intrinsic and extrinsic factors could not be validly averaged on a single scale of measurement Motivation and performance are not merely dependent upon environmental needs and external rewards Frederick Herzberg and his staff based their motivation hygiene theory on a variety of human needs and applied it to a strategy of job enrichment that has widely influenced motivation and job design strategies *Motivation to Work* is a landmark volume that is of enduring interest to sociologists psychologists labor studies specialists and organization analysts

Job Satisfaction C. J. Cranny, Patricia Cain Smith, Eugene F. Stone, 1992 In this era of frequent corporate restructuring and rapid technological change successful companies must have employees who are open to innovation and to changing roles and are able to work together productively Research shows that employees most likely to be adaptable cooperative and productive are those who are satisfied with their jobs Therefore it is essential that leaders of American business understand how to enhance job satisfaction within their organizations In Job Satisfaction top academic researchers in the field share state of the art information on creating job satisfaction its resulting benefits and the risks of having too many employees who are dissatisfied with their jobs As they show job satisfaction is also an extremely useful predictor for management An employee's level of job satisfaction is the single most important piece of data a manager or organizational psychologist can have to predict an employee's rate of absenteeism decision to resign or retire desire for union representation or level of psychological withdrawal Before they can enhance job satisfaction managers must understand its components Research demonstrates that an employee's level of satisfaction is based not only on events in the present and past but also on his perceptions of the future Foreseeing future opportunities for advancement for increased pay for participation in decision making or for networking lead to a high level of job satisfaction In fact the authors reveal perceiving future opportunity can actually be more motivating than actually receiving a raise getting promoted or being given additional responsibilities Job Satisfaction dispels the notion that job stress necessarily leads to dissatisfaction and shows how an organization should focus on increasing satisfaction rather than just reducing stress It is especially

important for managers to stimulate job satisfaction by improving their employees sense of achievement through making tasks and their objectives clear as well as giving feedback Academics and managers alike will find Job Satisfaction a source of new and useful information for understanding and enhancing satisfaction on the job **Journal of Collective Negotiations in the Public Sector** ,1996 **Motivation to Work** Frederick Herzberg,2017-10-27 Quality work that fosters job satisfaction and health enjoys top priority in industry all over the world This was not always so Until recently analysis of job attitudes focused primarily on human relations problems within organizations While American industry was trying to solve the unsolvable problem of avoiding interpersonal dissatisfaction problems with the potential for solution such as training and quality production were ignored When first published The Motivation to Work challenged the received wisdom by showing that worker fulfillment came from achievement and growth within the job itself In his new introduction Herzberg examines thirty years of motivational research in job related areas Based on workers accounts of real events that have made them feel good or bad on the job the findings of Herzberg and his colleagues have stimulated research and controversy that continue to the present day The authors surprisingly found that while a poor work environment generated discontent improved conditions seldom brought about improved attitudes Instead satisfaction came most often from factors intrinsic to work achievements job recognition and work that was challenging interesting and responsible The evidence marshaled by this volume called into question many previous assumptions about job satisfaction and worker motivation Feelings about intrinsic and extrinsic factors could not be validly averaged on a single scale of measurement Motivation and performance are not merely dependent upon environmental needs and external rewards Frederick Herzberg and his staff based their motivation hygiene theory on a variety of human needs and applied it to a strategy of job enrichment that has widely influenced motivation and job design strategies Motivation to Work is a landmark volume that is of enduring interest to sociologists psychologists labor studies specialists and organization analysts
