The book gives you an introduction to installing the basic tools required, introduces the reader with the hardware as well as the software, different scopes of it, and how one can create different applications out of it. The book presents 8 different tutorials to play with and understand the tool better, which starts from a beginner's level by talking about controlling simple LEDs with a mobile app and slowly progresses by introducing new elements in the application, explaining data exchange with Arduino and the smart phone via Bluetooth, and finally the last tutorial that helps the user create a full Android smart phone controlled robot.
