

My Personal Philosophy Of Education

As a student at Mercy College and an upcoming Teacher, what is important to me is fully gaining knowledge from my education that will prepare me to be the best possible teacher. Being a student can be very tough in many ways. Handling the work workload that is given to us, the number of essays we have to write, and the homework assignments we have to do can bring a lot of tension stress and painful headaches. One thing I learned from the college experience that is going to stick with me for life is that the workload can be very hard to handle, but after it's done and I gain knowledge, I will feel very blessed and very happy with the amount of work that I did. Honestly speaking, that is the best thing I have learned as a student. Doing all the work and gaining knowledge and using that in my everyday life is a privilege. Not all people get to go to school or get to go to college and learn subjects or gain knowledge from teachers or from some of the best professors that the school has to offer. Also, it's very important for us as students to build a connection with our professors and show them every student in the classroom wants to learn from them and wants to be as successful as they can. In my opinion, professors are some of the best people out there; if we really think about it, it is professors who are the reason each year young people like me and other college students from all over the world are graduating and going on to do the jobs that they love. Professors are the reason why people in the world are so successful and knowledgeable, and it honestly hurts me to say that they don't get enough recognition or not enough respect or all the love that they deserve. It is very important for professors to feel the connection with their students and treat them as daughters and sons that they want to see succeed. It is also very important for professors to make sure their students get the education that they need to be successful in life.

My Philosophy Education Paper:

Jesse Stuart On Education J.R. LeMaster, 2014-07-15 Could a man who never earned a master's degree tell the nation's teachers and administrators how to run their schools? Jesse Stuart, who had a life-long love of education, did just that. From Stuart's autobiographical works, J.R. LeMaster has chosen selections that demonstrate his philosophy of learning and teaching and his philosophy of life. The selections establish a loose chronology of events in Stuart's lifelong education and describe his experience as preschooler, student, teacher, and school administrator. This multiple perspective, LeMaster suggests, is essential to understanding the process we call education: a process Jesse Stuart located in nature, believing that human beings are first and foremost natural beings and only incidentally cultural beings. That is, while we belong to an order of human beings, we also belong to a larger order, a universe of living things. In his general introduction, LeMaster discusses Stuart's life and philosophy, providing the reader with a backdrop against which to study selections from *Beyond Dark Hills*, *The Thread That Runs So True*, *The Year of My Rebirth*, *God's Oddling*, *Mr. Gallion's School*, *To Teach To Love*, and other Stuart works. Each excerpt is illumined by LeMaster's discussion of its place in Stuart's philosophy of education. Those concerned with the apparent breakdown of the American educational system will find much to consider in LeMaster's discussion of the implications of Stuart's views on education. He contends that the present crisis in our schools stems from an inadequate philosophy for living and that Jesse Stuart, who believed education was a natural development, knew as much all along.

The Road Traveled and Other Essays Steven M. Cahn, 2018-12-26 *The Road Traveled and Other Essays* presents the recent work of philosopher and educator Steven M. Cahn. This book offers his latest reflections on the nature of well-being, the rationality of religious belief, and the aims of higher education. Also included are a selection of his challenging philosophical puzzles. The work concludes with a detailed account of his career as a faculty member, foundation executive, and university administrator.

The Dream and the Reality of Teaching Keen J. Babbage, 2011-05-05 The dream of teaching is that it's fascinating, meaningful, inspiring, and rewarding. The reality of teaching is that it can be exhausting, frustrating, heart-breaking, and disappointing. This book guides prospective teachers through an analysis of the profession they are considering and of their match with that profession and leads current teachers through an analysis of their career achievements, progress, challenges, and goals.
