Full Cock Position

Our safety device, which is an added degree of safety on your rifle, becomes one of the hammer block positions (FULL COCK, FULL COCKED, or FULL COCKED).

Remember the safety. It has a check and tested. Any fault, however, is never really complete. Handling safety that does not have.

#### Hammer Block Safety

The hammer is a round button.

To move the hammer to the full cock position, it will be in the SAFE position and the word SAFE will be on the button.

In the Full Cock position and in some way to carry your will other than the action.

When the hammer is in the hammer to position, it will not move unless you pull it. If the hammer is in the SAFE position, it will.

In the Full Cock position, push it to the Full Cock position. A red ring will be on the button as it is moving. If the hammer is pulled all

the way back at this point, the rifle will be locked and ready to fire.

#### NOTE TO LEFT-HANDED SHOOTERS:

The safety mechanism is designed for right-handed use and cannot be converted for left-handed operation.

#### 2. Full Cock and Half Cock Hammer Positions

Exposed hammer lever actions have, for over a century, served as inspiration for the hammer for both manual cocking of the rifle as well as the traditional half cock safety position. Your rifle has these traditional hammer positions as well as the added benefit of a hammer block safety button. Use the following hammer positions in conjunction with the hammer block safety for the safest possible operation.

A. The Full Cock position of the hammer is when it is at its furthest point back, the firing pin (the trigger) is pulled when the hammer is in this position, and the safety button is in the Full Cock position. The gun will fire. Note: If the trigger is pulled when the hammer is in the Full Cock position, and the rifle is on SAFE, the hammer will not, but will stop before it strikes the firing pin.

B. The Half Cock position of the hammer is between the Full Cock position and the full forward position, (the COCKED position).

Full Cock

Half Cock

1. To move the hammer to the Half Cock position, first put the hammer block safety button on SAFE. The hammer may be moved from Full Cock to the Half Cock position by simply holding the hammer in the Full Cock position with your thumb. Keep your thumb on the hammer as you pull the trigger. As soon as you feel the hammer spring forward pressure against your thumb, remove your finger from the trigger and slide the hammer fully forward to the Half Cock position (the COCKED position). The hammer is now in the Half Cock "Safe" position.
