PreMBA Analytical Primer Regina Trevino, 2008-10-13 This book is a review of the analytical methods required in most of the quantitative courses taught at MBA programs. Students with no technical background or who have not studied mathematics since college or even earlier may easily feel overwhelmed by the mathematical formalism that is typical of economics and finance courses. These students will benefit from a concise and focused review of the analytical tools that will become a necessary skill in their MBA classes. The objective of this book is to present the essential quantitative concepts and methods in a self-contained, non-technical, and intuitive way.

Race & Economics Walter E. Williams, 2013-09-01 Walter E. Williams applies an economic analysis to the problems black Americans have faced in the past and still face in the present to show that that free market resource allocation, as opposed to political allocation, is in the best interests of minorities. He debunks many common labor market myths and reveals how excessive government regulation and the minimum wage law have imposed incalculable harm on the most disadvantaged members of our society.
