Microeconomics Campbell McConnell, 2011 **Microeconomics** Buford Curtis Eaton, Diane F. Eaton, 1995 This core introductory/intermediate text explains the principles of microeconomics and persuades students to think like an economist when posed with real world problems. Each chapter opens with a question from ordinary life then sets up the structure of a model required to solve the problem and explains the more general theories attached. A high degree of pedagogy and case studies should ensure student understanding of key concepts. Presented is a problem solving approach that reveals the working methodology of the microeconomics theorist from the specific application to the general theory. *Microeconomics* and full year/intermediate level courses in *Microeconomics*. It is also intended as a supplement for Managerial Economics courses and one semester MBA Introduction to Microeconomics courses. *Microeconomics Chapters 1-6* McConnell, 1995-01-01

Chapters 12 Competition Policy and Regulation and the new chapter 13 together become a new Part Four under the new Part heading Promoting Efficiency and Dealing with Market Failure. The contents of these chapters are closely related. The new Part gives more emphasis to the important and popular topic of market failure. Some minor rewriting was necessary to accommodate these changes, however the content and structure of the chapters did not change significantly. A number of new high quality interest boxes Explanatory Power, Economics at Work, Counterpoint, Historical Perspective have been added. These boxes employ concepts developed in the chapter and use at least two newly defined terms italicised in text from the chapter. These boxes illustrate the relevance and usefulness of ideas introduced in the text. Facts and numbers throughout the text have been rechecked and updated where appropriate and 50% of the end of chapter questions for review and problems
