Parkin Microeconomics, Eleventh Edition Mark Rush,2014 **The Economics of Gender Equality in the Labour**
Market Meltem İnce Yenilmez,Gül Ş. Huyugüzel Kışla,2021-03-07 This book evaluates the global labour market in the
context of gender equality and the associated policies and regulations particularly in developing markets to recommend
measures for encouraging gender equality It exposes the barriers that women employees encounter as well as some of the
societal and workplace policies they specifically are subject to Important themes within this topic include participation rates
the looming gap in hourly pay availability of part time and full time positions value and social status associated with jobs held
by men and women The book examines how global gender policy objectives such as gender equality in careers gender
balance in decision making and gender dimensions in research can be incorporated into policy frameworks The book
analyzes the gendered nature of assumptions processes and theories The juxtaposition between family and work tradition
and modernity and dependency and autonomy clearly still seems to be misunderstood Therefore the book asks whether work
improves women s positions in society and or changes their roles in their families The authors explore and uncover the
connections among employment entrepreneurship migration economies and gender global labour markets and provide
helpful solutions to the perceptions surrounding women s status risks and inequality that limit their economic participation
This insightful read provides comprehensive details on a variety of themes and encourages further research on policies that
are key to promoting gender equality The book will appeal to postgraduate students and researchers of labour and feminist
