**Exploring Physical Anthropology Laboratory Manual & Workbook** Suzanne E. Walker-Pacheco, 2017-02-01

Exploring Physical Anthropology is a comprehensive full color lab manual intended for an introductory laboratory course in physical anthropology. It can also serve as a supplementary workbook for a lecture class particularly in the absence of a laboratory offering. This laboratory manual enables a hands on approach to learning about the evolutionary processes that resulted in humans through the use of numerous examples and exercises. It offers a solid grounding in the main areas of an introductory physical anthropology lab course: genetics, evolutionary forces, human osteology, forensic anthropology, comparative functional skeletal anatomy, primate behavior, paleoanthropology, and modern human biological variation.

Eloise Brown Carter, 1999 An undergraduate lab manual containing 27 lab exercises designed to encourage students to ask questions, pose hypotheses, and make predication before they begin lab work. Students are required to synthesize results from observations and experiments, draw conclusions, apply results to new problems, and to design their own investigations. Scientific writing is emphasized throughout. Includes appendices on scientific writing, chi square test, and terminology and techniques for dissection, as well as a section of color photos. This edition contains a new lab on cellular respiration and several labs are modified based on new evidence in molecular biology. Wire spiral binding. Annotation copyrighted by Book News Inc.
