

## Grapple Beam

When you use the Grapple Beam, you will be able to latch onto a Grapple Point, gain momentum and fly through the air. ## Visors

There are four visors that Samus can use, each with functions differently. Try to utilize the special characteristics of each one as you search the planet and fight enemies.

### Visor Select Screen

To change the visor, press and hold the - Button, point at the visor you want to use, and let go of the - Button. Use the specific functions of each visor to help you progress through the game.

**Note:** When visors other than the Combat Visor are equipped, you can change back to the Combat Visor by tapping the - Button or, with some visors, the L Button.

#### Scout's Visor

#### Combiner Visor

#### Thermal Visor

#### X-Ray Visor

### Combat Visor

The standard visor. You will use this mostly during battle.

### Scan Visor

This visor reads information from creatures or computer terminals and collects data. You cannot use weapons while you are using the Scan Visor.

#### Scan Targets

Important targets are displayed in red, and other targets are displayed in orange. Faded targets indicate a target has already been scanned.

#### Item Cursor

You can view creatures or various substances that are caught within the cursor.

## Scanning

With the target caught within the aim cursor, press and hold the Z Button to scan. Some devices can be activated by scanning. Also, when particularly important items are scanned, they are recorded in the Log Book (page 18).

## Thermal Visor

This can detect the temperature of your surroundings. You may be able to see the locations or weaknesses of some enemies that you can't detect with the Combat Visor. It may also show you areas where the temperature is abnormal.

## X-Ray Visor

This allows you to see through walls and find hidden passages or invisible objects. It is also possible to use it to see enemies that use optical camouflage to make themselves invisible.
