Community Activation for Integral Development Ronnie Lessem, 2016-12 Typically development studies have evolved top down with theories born and bred in the west affecting practices in the rest This book looks at these developments by turning them on their head instead starting bottom up with an emphasis on what the author terms Community Activation With a selection of case studies this volume looks at where community activation can be found and explores how it could evolve and be of use in developing societies at large In the process he addresses such topics as how to embed development in a particular society how to generate social and economic solidarity and how to generate wealth from pre industrial and post industrial networks

African Politics and Ethics Munyaradzi Felix Murove, 2020-10-06 In this book Munyaradzi Felix Murove explores African traditional ethical resources for African politics Arguing that African ethics is integral to African post colonial political contentious discourse Murove invites the reader to reflect on various problematic political issues in post colonial Africa and how African ethics has been applied in these situations Starting with a succinct discussion of the scope of African ethics he discusses how African ethical values have been applied by post colonial politicians in the reconstruction of their societies Further Murove looks critically at the issue of African poverty and how the ethic of regional integration and economic cooperation among post colonial African nation states has been instrumental to efforts aimed at overcoming the scourge of poverty The main question this book seeks to answer is Are African traditional ethical values a panacea to modern African political problems

Psychopathology in Women Margarita Sáenz-Herrero, 2019-07-15 This book examines sex and gender differences in the causes and expression of medical conditions

including mental health disorders Sex differences are variations attributable to individual reproductive organs and the XX or XY chromosomal complement Gender differences are variations that result from biological sex as well as individual self representation which include psychological behavioural and social consequences of an individual s perceived gender Gender is still a neglected field in psychopathology and gender differences is often incorrectly used as a synonym of sex differences A reconsideration of the definition of gender as the term that subsumes masculinity and femininity could shed some light on this misperception and could have an effect in the study of health and disease This second edition of Psychopathology clarifies the anthropological cultural and social aspects of gender and their impact on mental health disorders It focuses on gender perspective as a paradigm not only in psychopathology but also in mental health disorders As such it promotes open mindedness in the definition and perception of symptoms as well as assumptions about those symptoms and raises awareness of mental health
