Language and Education M.A.K. Halliday, 2007-03-29 The ninth volume in Professor M A K Halliday's collected works is dedicated to the subject of language and education. Professor Halliday sums up the scope of language education under the following five headings: mother tongue education, second language learning, multilingual societies, contexts of language education, and educational linguistics. In addition to the previously unpublished *Applied Linguistics as an Evolving Theme* 2002, originally presented by Professor Halliday on the occasion of his being awarded the first Gold Medal by the International Association of Applied Linguistics (AILA), this volume contains another nineteen papers covering a comprehensive breadth of topics in language and education addressed by Professor Halliday over the course of his career. The chapters cover language development, language teaching, multilingualism, functional variation in language, and the place of linguistics in education.

War and Its Ideologies Annabelle Lukin, 2018-10-09 Ideology is so powerful it makes us believe that war is rational despite both its brutal means and its devastating ends. The power of ideology comes from its intimate relation to language; ideology recruits all semiotic modalities but language is its engine room. Drawing on Halliday's linguistic theory, in particular his account of the semiotic big bang, this book explains the latent semiotic machinery of language on which ideology depends. The book illustrates the ideological power of language through a study of perhaps the most significant and consequential of our ideologies: those that enable us to legitimate, celebrate, even venerate war at the same time that we

abhor denounce and proscribe violence To do so it makes use of large multi register corpora including the British National Corpus and the reporting of the 2003 invasion of Iraq by Australian US European and Asian news sources Combining detailed text analysis with corpus linguistic methods it provides an empirical analysis showing the astonishing reach of our ideologies of war and their profoundly covert and coercive power **Introducing Systemic Functional Linguistics** Hui
