*Language, Culture, and Mind* Paul Kockelman, 2010-02-18 Based on fieldwork carried out in a Mayan village in Guatemala this book examines local understandings of mind through the lens of language and culture It focuses on a variety of grammatical structures and discursive practices through which mental states are encoded and social relations are expressed inalienable possessions such as body parts and kinship terms interjections such as ouch and yuck complement taking predicates such as believe and desire and grammatical categories such as mood status and evidentiality And more generally it develops a theoretical framework through which both community specific and human general features of mind may be contrasted and compared It will be of interest to researchers and students working within the disciplines of anthropology linguistics psychology and philosophy *Demonstratives in Cross-Linguistic Perspective* Stephen C. Levinson, Sarah Cutfield, Michael J. Dunn, N. J. Enfield, Sérgio Meira, 2018-07-19 The definitive guide to demonstratives which play a key role in language acquisition and use *Relationship Thinking* N. J. Enfield, 2013-11-26 In *Relationship Thinking* N. J. Enfield outlines a framework for analyzing social interaction and its linguistic cultural and cognitive underpinnings by focusing on human relationships This is a naturalistic approach to human sociality grounded in the systematic study of real time data from social interaction in everyday life Many of the illustrative examples and analyses in the book are a result of the author's long term field work in Laos Enfield promotes an interdisciplinary approach to studying language culture and mind building on simple but powerful semiotic principles and concentrating on three points of conceptual focus The first is human agency the combination of flexibility and accountability which defines our possibilities for social action and relationships and which makes the fission and fusion of social units possible The second is enchrony the timescale of conversation in which our social relationships are primarily enacted The third is human sociality a range of human propensities for social interaction and enduring social relations grounded in collective commitment to shared norms Enfield's approach cuts through common dichotomies such as cognitive versus behaviorist or public versus private arguing instead that these are indispensable sides of single phenomena The result is a set of conceptual tools for analyzing real time social interaction and linking it with enduring relationships and their social contexts The book shows that even or perhaps especially the most mundane social interactions yield rich insights into language culture and mind **Language, Culture, and Society** James Stanlaw, Nobuko Adachi, 2025-03-31 Why should we study language How do the ways in which we communicate define our identities And how is this all changing in the digital world Over seven editions many have turned to *Language Culture and Society* for answers to questions like these because of its comprehensive coverage of all critical aspects of linguistic anthropology This eighth edition carries on the legacy while addressing some of the newer pressing and exciting challenges of the twenty first century such as issues of language and power language ideology linguistic diasporas as well as online and digital ecosystems New to this edition are a reconceptualization of how linguistics approaches race gender

and sexuality with additional chapters and sections on how linguistics benefits archaeology and biological anthropology as well as considerations of the relationship between language and truth ethics and war and politics It also features enhanced and updated pedagogical features such as learning objectives updated resources for continued learning and cross references to updated encyclopedias of linguistic anthropology

Natural causes of language N. J. Enfield, 2014 What causes a language to be the way it is Some features are universal some are inherited others are borrowed and yet others are internally innovated But no matter where a bit of language is from it will only exist if it has been diffused and kept in circulation through social interaction in the history of a community This book makes the case that a proper understanding of the ontology of language systems has to be grounded in the causal mechanisms by which linguistic items are socially transmitted in communicative contexts A textit biased transmission model provides a basis for understanding why certain things and not others are likely to develop spread and stick in languages Because bits of language are always parts of systems we also need to show how it is that items of knowledge and behavior become structured wholes The book argues that to achieve this we need to see how causal processes apply in multiple frames or time scales simultaneously and we need to understand and address each and all of these frames in our work on language This forces us to confront implications that are not always comfortable for example that a language is not a real thing but a convenient fiction that language internal and language external processes have a lot in common and that tree diagrams are poor conceptual tools for understanding the history of languages By exploring avenues for clear solutions to these problems this book suggests a conceptual framework for ultimately explaining in causal terms what languages are like and why they are like that

**The Art of Interpretation in the Age of Computation** Paul Kockelman, 2017 The Art of Interpretation is about media mediation and meaning It focuses on a set of interrelated transformations whereby seemingly human specific modes of meaning become automated by machines formatted by protocols and networked by infrastructures It analyzes the conditions and consequences of such transformations for selfhood social relations and semiosis

Agent, Person, Subject, Self Paul Kockelman, 2013-01-17 This book offers both a naturalistic and critical theory of signs minds and meaning in the world It provides a reconstructive rather than deconstructive theory of the individual one which both analytically separates and theoretically synthesizes a range of faculties that are often confused and conflated agency understood as a causal capacity subjectivity understood as a representational capacity selfhood understood as a reflexive capacity and personhood understood as a sociopolitical capacity attendant on being an agent subject or self It argues that these facilities are best understood from a semiotic stance that supersedes the usual intentional stance And in so doing it offers a pragmatism

grounded approach to meaning and mediation that is general enough to account for processes that are as embodied and embedded as they are articulated and enminded In particular while this theory is focused on human specific modes of meaning it also offers a general theory of meaning such that the agents subjects and selves in question need not always or even usually map onto persons And while this theory foregrounds agents persons subjects and selves it does this by theorizing processes that often remain in the background of such often erroneously individuated figures ontologies akin to culture but generalized across agentive collectivities interaction not only between people but also between people and things and anything outside or in between and infrastructure akin to context but generalized to include mediation at any degree of remove **Trilingual Education in Europe** Jasone Cenoz,Durk Gorter,2005 Journal of Anthropological Research ,2012
