

88 in. Regular

Chassis

All Land-Rover models are based on box-section chassis frames of immense strength, built to withstand the constant shocks of day-in, day-out, cross-country operation. They are painted inside as well as outside and are therefore resistant to rust and corrosion over very long periods of use.

Transmission

The main gearbox has four forward speeds and one reverse. Synchronesh engagement is provided on all forward gears and thus eliminates the need for special gear-changing technique in respect of first and second gear. An additional ratio is provided by the transfer box so that in all, eight forward and two reverse speeds are available.

Power Take-off

Provision for centre and rear power take-off drives.

109 in. Long

4-cylinder petrol engine

The four-cylinder, 2½-litre petrol engine is a well-proved unit of outstanding reliability that has powered many millions of Land-Rover miles in all corners of the world.

4-cylinder diesel engine

Diesel power is available and adds further to the efficiency and economy of the Land-Rover in working conditions which favour the use of this type of engine. This unit is particularly suitable for stationary P.T.O. applications having an inbuilt governor and a hand throttle as standard equipment.

6-cylinder petrol engine

The 2.6 litre six-cylinder petrol engine is standard in 1-Ton models, and is offered as an alternative in the Long Land-Rover. Its greater capacity provides an increased power output for those uses whose operations call for above average road work.
