

5-1 General description

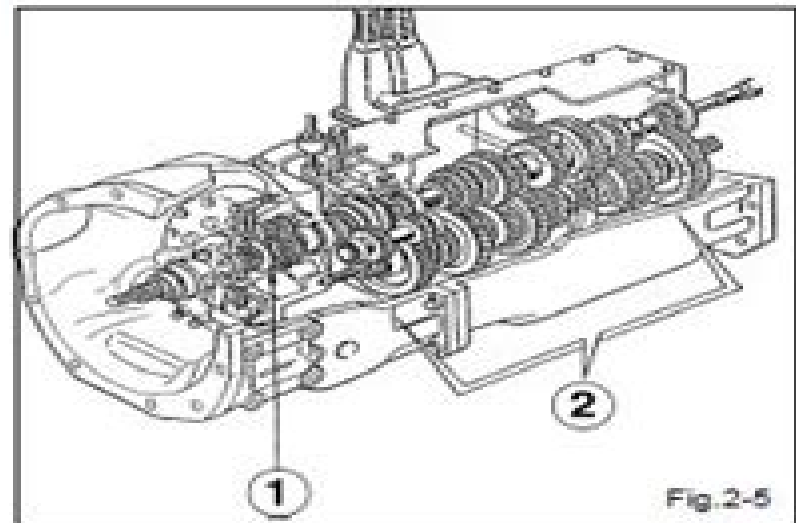

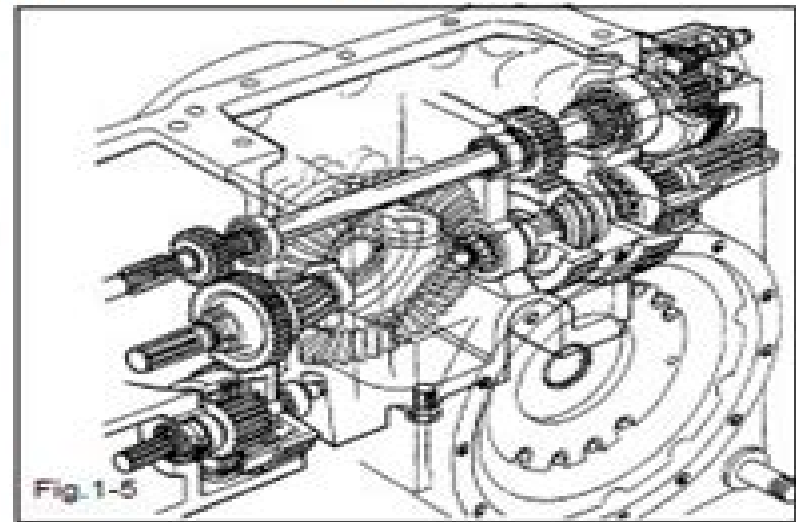

1 - Introduction

The transmission is the modular type, the standard version of which has a gearbox with 6 synchronized gears, three selection ranges (low - standard - fast) and a synchronized reverse shuttle.

On request, Top tractors can be equipped with an electrohydraulically engaged reduction unit that can be operated on load in order to reduce the speed by 20%.

Again on request, all tractors (both Top and techno) can be equipped with a creeper gear that reduces the speed by 80%.

The Top and techno transmissions mounted on Legend 105 – 115 – 130 – 145 tractor are identical, while most of the gears and the bevel gear pair in the transmission installed in model 165 are subjected to a special shot-peening treatment that increases its resistance to stress. It also has an extra disc in the brake assembly (5 instead of 6) and, consequently, two side final drives with different components.
