

**AUTOMATIC TRANSMISSION**

When compared to current production 5-speed automatic transmission, the new 6-speed ZF 6HP26 automatic transmission provides: higher torque capacity, reduced length, reduced weight and improved vehicle performance.

The Mechatronic<sup>TM</sup> module is the combination of the hydraulic shift unit with transmission control module (TCM) and is integrated in the transmission housing. This design allows more accurate control of signals and pressures resulting in more precise gearshifts. A further advantage is improved reliability due to the reduction in the harnessing and connectors between the transmission and its controller.

The electronic transmission control system is constantly fed with data about transmission and vehicle operating conditions. As a result, the electronic system provides drive strategies that perfectly match special operating conditions such as cruise control.

Considerable engineering effort has been undertaken in tuning the 4.2-liter engines and new 6-speed transmission to suit the driving characteristics of the XK.

The number is located on the automatic transmission casing adjacent to the selector level.
