

Your new Fender Jaguar Guitar represents one of the finest electric guitars that is available anywhere. The Jaguar incorporates many new developments and standard features developed by Fender engineers. Not only do these features contribute to a more noticeable ease of playing, but offer a completely new tone circuit providing a wide range of tone variations suitable for every type of guitar work.

The Fender Jaguar employs all the units necessary for custom playing action and perfect string intonation such as the off-set waist design, smooth tremolo action, and individually adjustable bridges. In addition, it offers the new Fender Mute, new lead circuit and pickups, and the shorter scale (24") neck with 22 frets. The adjustments for these features are easy to set and require little, if any, further attention once adjusted to your playing preference.

The purpose of this brochure is to acquaint you with these adjustments and assure your complete satisfaction with your Jaguar Guitar.
