

**James Oakes (1813-1891): Early Life, His Literary Contributions, His
Structuralist Analytical Perspective**

Exercise 1.1

1. "What is structuralism?"

Structuralism: study of how individual mental units work together to create behavior.

2. "What primary study would you use to study mental phenomena in the
contextual world of structuralism?" (What does research
show about study of mental phenomena in the context of behavior? Would you
show that study of the individual mental units would be more useful than study
of the whole mental unit? And how would you study them?)

3. "According to Carlisle White, what happened in the mental world of
structuralism?"

According to Carlisle White, the mental world of structuralism was a very
small world of mental units.

4. "What differences can you make about the world of mental units in
structuralism?"

There were differences in mental units in structuralism. Because mental units were
small and were not very complex, they could be very simple. Mental units were
very simple, but as they became more complex, they became more complex. Mental
units were not very complex, but as they became more complex, they became more
complex.
