Shahidul Islam, 2021-12-23 With the exception of Sri Lanka South Asian countries have not achieved quality basic education an essential measure for escaping poverty inequality and social exclusion In The Political Economy of Education in South Asia John Richards Manzoor Ahmed and Shahidul Islam emphasize the importance of a dynamic system for education policy The Political Economy of Education in South Asia documents the weak core competency reading and math outcomes in government primary schools in India Pakistan Bangladesh and Nepal and the consequent rapid growth of non government schools over the last two decades It compares the training hiring and management of teachers in South Asian schools to successful national systems ranging from Singapore to Finland Discussing reform options it makes the case public good and public priorities are better served when both public and non government providers come under a strong public policy and accountability framework The Political Economy of Education in South Asia draws on the authors broad engagement in education research and practice in South Asia as well as analysis by prominent professors of education and NGO leaders to place basic education in a broad context and make the case that universal literacy and numeracy are necessary foundations for economic growth Arithmetic, Geometry, Cryptography and Coding Theory Alp Bassa, Alain Couvreur, David Kohel, 2017-03-27 This volume contains the proceedings of the 15th International Conference on Arithmetic Geometry Cryptography and Coding Theory AGCT held at the Centre International de Rencontres Mathématiques in Marseille France from May 18 22 2015 Since the first meeting almost 30 years ago the biennial AGCT meetings have been one of the main events bringing together researchers interested in explicit aspects of arithmetic geometry and applications to coding theory and cryptography This volume contains original research articles reflecting recent developments in the field When Biospheres Collide: A History of NASA's Planetary Protection Programs Michael Meltzer, 2012-01-27 PRINT FORMAT ONLY NOTE NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT OVERSTOCK SALE Significantly reduced list price This new book from the NASA History Series tackles an interesting duo of biological problems that will be familiar to anybody who has seen photos of Apollo astronauts quarantined after their return to Earth Namely how do we avoid contaminating celestial bodies with Earthly germs when we send spacecraft to study these bodies and how do we avoid spreading foreign biological matter from space when our robotic and human spacefarers return to Earth Biological matter from an external system could potentially cause an unchecked epidemic either on Earth or in space so strict precautions are necessary Each time a space vehicle visits another world it runs the risk of forever changing that extraterrestrial environment We are surrounded on Earth by a m lange of different microorganisms and if some of these hitchhike onboard a space mission they could contaminate and start colonies on a different planet Such an occurrence would irrevocably alter the nature of that world compromise all future scientific exploration of the body and possibly damage any extant life on it By inadvertently carrying exotic organisms back to Earth on our spacecraft we also risk

the release of biohazardous materials into our own ecosystem Such concerns were recognized by scientists even before the 1957 launch of Sputnik This book presents the history of planetary protection by tracing the responses to the above concerns on NASA's missions to the Moon Mars Venus Jupiter Saturn and many smaller bodies of our solar system The book relates the extensive efforts put forth by NASA to plan operations and prepare space vehicles that return exemplary science without contaminating the biospheres of other worlds or our own To protect irreplaceable environments NASA has committed to conducting space exploration in a manner that is protective of the bodies visited as well as of our own planet
