Arab Dawn Bessma Momani, 2015-11-26 In the West news about the Middle East is dominated by an endless stream of reports and commentary about civil war, sectarian violence, religious extremism, and economic stagnation. But do they tell the full story? For instance, who knew that university enrolment in the war-torn Palestinian territories exceeds that of Hong Kong, or that more than a third of Lebanese entrepreneurs are women? Change is on its way in the Middle East, argues Bessma Momani, and its cause is demographic. Today one in five Arabs is between the ages of fifteen and twenty-four. Young, optimistic, and increasingly cosmopolitan, their generation will shape the region's future. Drawing on interviews, surveys, and other research conducted with young people in fifteen countries across the Arab world, Momani describes the passion for entrepreneurship, reform, and equality among Arab youth. With insightful political analysis based on the latest statistics and first-hand accounts, *Arab Dawn* is an invigorating study of the Arab world and the transformative power of youth. **Isles of**

**Amnesia** Mark J. Rauzon, 2016-01-31 For over a quarter century biologist Mark J. Rauzon worked in the field of island restoration, traveling throughout the American Insular Pacific to eradicate invasive plants and animals introduced by humans. The region spans from Hawaii to Samoa to Guam and their neighbors, small, obscure tropical islands that are hundreds if not thousands of nautical miles from each other. These little-known US possessions and territories include various islands and atolls: Jarvis, Howland, Baker, the Northern Marianas, Wake, Palmyra, Johnston, and Rose Atoll, among others. They anchor a vast National Marine Monument program created in 2009 and expanded in 2014 to protect the largest area in the world from exploitation. In *Isles of Amnesia*, Rauzon chronicles the ecological and human history of these islands, enlivened with his first-hand experiences of eradication efforts to restore atoll ecosystems and maximize native biodiversity. Each chapter focuses on an individual island or island group, revealing how each location has its own particular story, secret past, or ecological lesson to be shared. Taken as a whole, the region has played a unique role in American history, with the remoteness of the islands having served the needs of whalers and guano miners in the 1800s and, in later years, that of military secret projects: missile launching, chemical weapon incinerations, and air bases. Rauzon further explores the creation of the National Marine

Monuments and what their protection means to a changing ocean and presents original research about the US military's Pacific Project and germ warfare testing Illustrated with over seventy historical photographs and original drawings this much needed work tells the fascinating story of America's forgotten Pacific islands
