This new title describes the tests and processes undertaken to bring new medicines and medical devices to the market and the work of the government agencies which ensure products of the highest standard. The text covers the controls to prove quality, safety and efficacy prior to marketing and postmarketing pharmacovigilance requirements. The different European registration processes for both medicines and medical devices are explained. Important ethical issues in their development are also reviewed. The role of the UK and pan European regulatory authorities for medicines and medicinal devices, the MHRA and the EMEA and of the National Institute for Clinical Excellence NICE are explained. It is also an essential source for all working in the pharmaceutical and medical devices industries and in government agencies involved in the control of medicines and medical devices.
