Houck, Paul J. Speaker, 2024-03-26 Forensic Science Laboratory Benchmarking The FORESIGHT Manual takes a step by step instructional approach to utilizing FORESIGHT data detailing how labs can participate in the process to improve efficiencies The FORESIGHT Project a business benchmarking process for forensic service providers was created in 2008 to collect and report data while offering improvement to processes through analysis comparisons and best practice evaluations The program has grown to include more than 200 participating forensic laboratories worldwide FORESIGHT offers the capability for labs to improve core functions provide and benefit from metrics and thus improve the labs capabilities and functioning for the public good while maintaining their often limited fixed budgets Due to ever increasing caseloads forensic laboratories are constantly plagued by backlogged casework cases submitted to the laboratory but not yet worked This leads to inefficiencies delays and unhappy agencies expecting timely results Unfortunately even if a lab s slates were wiped clean and the backlog were erased many of the inefficient processes that created the backlog would still be in place Eventually and inevitably the lab would develop a new backlog Unique coverage and features Presents critical and proven cutting edge measures to utilize FORESIGHT data improve laboratory testing operational efficiency and policies without added additional costs Synthesizes the data input from more than 200 labs and a decade s worth of analytics to illustrate process improvements and the advantages of participating Outlines how to develop data driven responses to

solve current and future problems Forensic Science Laboratory Benchmarking will be of interest to quality assurance specialists economists supervisors in the parent agencies of the labs managers at all levels of any of the hundreds of public laboratories around the world and anyone concerned about the effectiveness and efficiency of laboratory testing As an operational guide the book provides a helpful roadmap to help public science agencies and forensic labs analyze how they operate improve on what works and change what doesn't to better meet their mission and serve their community's goals

Technology Market Transactions Frank Tietze, 2012-01-01 This study of technology auctions is long overdue The book provides a better understanding of intermediaries and their role and impact in markets for technology Both scholars and managers will find it insightful Alfonso Gambardella Bocconi University Italy From this book managers academics and innovation policy makers will all benefit from new insights into the complex relationships between external technology exploitation strategies patents technology trade and open innovation processes The convincing evidence drawn from a dataset of technology auctions helps firms to understand which of their patents are suitable for auction and also provides guidance to intermediaries to help improve the auction models The data presented in this book contributes to further price transparency on technology markets and hence to their further development Hugo Tschirky ETH Zurich Switzerland Within the open innovation paradigm firms need to operate efficiently in markets for technology This book presents original research on technology transactions market intermediaries and specifically the role of auctions as a novel transaction model for patented technologies Frank Tietze delivers an in depth discussion of the impact of empirical results upon transaction cost theory and in so doing provides the means for better understanding technology transaction processes in general and auctions in particular Substantiating transaction cost theory with empirical auction data the author goes on to explore how governance structures need to be designed for effective distributed innovation processes He concludes that the auction mechanism is a viable transaction model and illustrates that the auction design as currently operated by market intermediaries requires thorough adjustments Various options for possible improvements are subsequently prescribed The theoretical facets of this book will strongly appeal to business economists whilst its practical implications will provide an illuminating read for both academics and practitioners in the fields of innovation and intellectual property Revealing empirically substantiated technology prices this book will also prove to be of great interest to policy makers for further developing the markets for technology
