The Microbial World

Anton van Leeuwenhoek was a successful textile merchant in the city of Delft, in the Netherlands, in the late seventeenth century. He used magnifying lenses in his trade to examine cloth, but in 1665, after reading Robert Hooke's book *Micrographia*, van Leeuwenhoek became fascinated with using microscopes to explore the natural world. Hooke, an Englishman of about the same age as van Leeuwenhoek, had laboriously constructed microscopes that magnified objects roughly 30 times and used them to examine the fine structure of materials both living and dead. His greatest contribution to biology was the discovery of cells, which he first observed in cork slices, as the units from which living organisms are assembled. Hooke's writings inspired van Leeuwenhoek, who enjoyed blowing glass and grinding tiny lenses, to fabricate simple but remarkably powerful microscopes. Some of the 400 or so microscopes that van Leeuwenhoek built magnified images almost 300-fold, and could be used to observe objects one-tenth the size that Hooke had seen. If we consider that the best modern light microscopes of today are limited to around 1000-fold magnification, van Leeuwenhoek's accomplishments are even more astounding!

With his extraordinary lenses, van Leeuwenhoek pushed the frontiers of human knowledge to ever-smaller dimensions. No one had imagined living creatures so small they could not be seen by the human eye, yet van Leeuwenhoek saw them all around us, on us, even inside us. In a letter to the Royal Society of London in 1684, he related that:

The number of these Animals in the scurf of a man's Teeth, are so many, that I believe they exceed the number of Men in a kingdom. For upon the examination of a small parcel of it, no thicker than a Horse-hair, I found too many living Anima's therein, that I guess there might have been 1000 in a quantity of matter no bigger then the 1/100 part of a sand.

In another letter, he confided with amazement that:

I then most always saw, with great wonder, that in the said matter there were many very little living animalcules, very prettily a-moving.

Thus, this modest Dutch merchant revealed a whole new "microscopic" world to humanity. Van Leeuwenhoek discovered microorganisms.

Microbiology Wessner Dupont
