Meaning in Context Jonathan J. Webster, 2008-04-21 *Meaning in Context* collects some of the biggest names in systemic functional linguistics in one volume and shows how this theory can be applied to language studies intelligently in order to arrive at a better understanding of how meaning is constructed in language. The chapters use systemic functional theory to examine a range of issues including corpus linguistics, multimodality, language technology, world Englishes and language evolution. This forward thinking volume will be of interest to researchers in applied linguistics and systemic functional linguistics.

Theorizing and Applying Systemic Functional Linguistics Bo Wang, Yuanyi Ma, 2023-12-29 This collection reflects on developments in the field of Systemic Functional Linguistics (SFL) as embodied in the work of Christian M. I. M. Matthiessen, highlighting his diverse contributions to the field from theoretical and applied perspectives. The book surveys Matthiessen's academic career and illustrates the myriad ways in which his work has reverberated through to current innovations in SFL research. The book also exhibits his theoretical contributions to major linguistic topics and his influence on the development of SFL. Written by some of the world's foremost scholars in the field, chapters cover such topics as theories of SFL and its applications in different domains as well as the developmental trajectories of SFL in major geographic areas. Addressing the key issues in SFL through the lens of Matthiessen's career, this book is an accessible resource for students and scholars in systemic functional linguistics as well as those interested in the systemic functional approach in related areas within linguistics.

Key Themes and New Directions in Systemic Functional Translation Studies Bo Wang, Yuanyi Ma, 2022-04-19 This collection features eight interviews with seven senior scholars whose seminal works involve the application of Systemic Functional Linguistics (SFL) to translation studies. It has advanced Systemic Functional Translation Studies (SFTS) as a research agenda in its own right with critical reflections and insights into future directions. The book introduces SFTS as a research field, tracing its development and situating the contributions of the scholars interviewed within this tradition. An international group of researchers working across a diverse range of topics within SFTS are interviewed, including Christian M. I. M. Matthiessen, Erich Steiner, J. R. Martin, Juliane House, Jeremy Munday, Adriana Pagano, and Akila Sellami Baklouti. Taken together, the collection offers a comprehensive account of theoretical and methodological developments in SFTS with critical overviews of these scholars' body of work within the research area and reflections on the emerging research that pushes SFTS scholarship into new frontiers. This volume will be of particular interest to scholars in translation studies and Systemic Functional Linguistics as well as those interested in innovations in linguistic theory.
