Abstract—This study examined the effectiveness of a 10-week, 12-session, group-based intervention for children with attention deficit hyperactivity disorder (ADHD) and conduct disorder (CD). The intervention was designed to address the social skills deficits and conduct problems associated with these disorders. The study was conducted in a community-based setting and involved 40 children (20 with ADHD and 20 with CD) and their parents. The intervention was evaluated using a pre-test, post-test, and follow-up design. Results showed that the intervention was effective in improving social skills and reducing conduct problems in both groups of children. The findings suggest that group-based interventions can be an effective way to address the social and behavioral needs of children with ADHD and CD.

Abstract: This paper examines the impact of the 1997-1998 Asian financial crisis on the performance of the Japanese stock market. The results show that the Japanese stock market experienced a significant decline in performance during the crisis period. The decline was more pronounced for companies with high foreign exposure and high debt ratios. The results also show that the Japanese stock market recovered its performance after the crisis period. The recovery was more pronounced for companies with high foreign exposure and high debt ratios. The results suggest that the Japanese stock market is vulnerable to the Asian financial crisis. The results also suggest that the Japanese stock market is resilient to the Asian financial crisis.
