RECORDING AND PA CONSOLES

Since its introduction, Mackie Designs' 8-Bus Series consoles have proven that excellent sonic quality, practical features and extreme durability needn't mandate a premium price. In hundreds of SR and recording installations, the 32-8, 24-8 and 16-8 deliver performance previously only found in consoles costing far more.

Instead of offering dozens of mix-and-match input and output module options, we have put more of what most users need into a single console design — enabling us to make them in quantities which can bring costs down.

All three 8-Bus consoles and the 24-E expander offer extensive monitoring, 4-band EQ, accurate, logarithmic taper faders and expansive, forgiving headroom. Equally as important, they are built to withstand the rigors of the environment and the casual, untrained user. 8-Bus consoles have withstood hundreds of thousands of

miles of touring, toppling monitors during major earthquakes, and every possible liquid that ever got near a mixing board.

A complete system. The 8-Bus console line consists of three in-line consoles, the 32x8x2 32-8, the 24x8x2 24-8 and the 16x8x2 16-8.

The 24-8 and 32-8 are expandable with Mackie's 24-E Expander console. The 24-E consists of 24 input channels and tape returns. It connects to the 32-8 or 24-8 via a proprietary cable. Multiple 24-E expanders may be daisy chained to provide 128 or more total input channels. The 24-E's outputs are pre-mixed in the expander to reduce line noise, thermal noise and to maintain sonic quality at the main console.

All three consoles and the 24-E are shipped with Mackie's rugged 220-watt triple-regulated power supply. Meter bridges and
