### Magento Logo

Magento's ability to scale allows shops with only a few products and simple needs to easily expand to tens of thousands of products and complex custom behavior without changing platforms. It offers a variety of plug-ins and themes which can easily enhance a customer's experience. There are a lot of aspects to the online store which need to be configured and how well that is accomplished is often dependent on business acumen. When it comes to custom functionality however that is where more complex programming is required. New call to action. Magento is designed to be utilized as an application by someone who isn't a developer. The Magento community is extremely large and very helpful. However at some point the average person is going to hit a wall. There are a number of reasons why developers are called upon to adjust a Magento website. It is a very robust system even at its most basic. Once you begin to integrate with other systems or introduce tens of thousands of products businesses often need the assistance of experienced developers. As an example we've had clients need additional options for how they view their dashboard. Typically you might be able to select viewing products in groups of 5, 25 and or 50. We have a client who wants to view 2000. The functionality can be changed only up to a point beyond that it needs to be customized by an expert who really understands Magento and follows best practices. Experienced developers will also tell you that speed is of the essence in ecommerce. No one wants to have to wait for systems to reload when you're doing a lot of online shopping. With such a robust list of features native to the application strains can be put on your server. While we haven't yet had a Magento client require more than one server for their online store I can foresee that situation arising in the future.

### Benefits of using Magento

- Easy to install and add additional layouts and plug-ins
- Open source technology that offers flexible scalable ecommerce solutions
- Effective and cost sensitive program
- Allows for various discounts and promotions during check out
- Provides more than 50 payment gateways
