Introduction to Scientific Computing and Data Analysis Mark H. Holmes, 2016-05-30 This textbook provides an introduction to numerical computing and its applications in science and engineering. The topics covered include those usually found in an introductory course as well as those that arise in data analysis. This includes optimization and regression based methods using a singular value decomposition. The emphasis is on problem solving and there are numerous exercises throughout the text concerning applications in engineering and science. The essential role of the mathematical theory underlying the methods is also considered both for understanding how the method works as well as how the error in the computation depends on the method being used. The MATLAB codes used to produce most of the figures and data tables in the text are available on the author's website and SpringerLink.

Through Lim's landscapes, mindscapes and heartscapes this volume alongside the exhibition offers a profound exploration of his artistic journey. Routledge Handbook of Sexuality Studies in East Asia Mark McLelland, Vera Mackie, 2014-09-15 This collection brings together cutting edge work by established and emerging scholars focusing on key societies in the East Asian region: China, Taiwan, Hong Kong, Japan, North and South Korea, Mongolia and Vietnam. This scope enables the collection to reflect on the nature of the transformations in constructions of sexuality in highly developed, developing and emerging societies and economies. Both Japan and China have established traditions of sexuality studies reflecting longstanding indigenous understandings of sex as well as more recent developments which interface with Euro American medical and psychological understandings. Authors reflect upon the complex colonial and economic interactions and cultural flows which have affected the East Asian region over the last two centuries. They trace local flows of ideas instead of defaulting to Euro American paradigms for sexuality studies. Through looking at regional and global exchanges of ideas about sexuality this volume adds considerably to our understanding of the East Asian region and contributes to wider discussions of social transformation, modernisation and globalisation. It will be essential reading in undergraduate and graduate programs in sexuality studies, gender studies, women's studies and masculinity studies as well as in anthropology, sociology, history, cultural studies, area studies and health sciences.
