

Introduction

The Tandem dual band receivers are unlike any other FrSky 2.4GHz or 900MHz receivers. They work simultaneously at both 900MHz and 2.4GHz frequencies. That means Tandem receivers provide not only the low latency signal and long-range control, also benefits from the enhanced level of high-reliability and anti-interference performance.

The Tandem series receivers adopt the triple antenna design that provides multi-directional wide coverage for the remote signal. The data (Power & Signal related) under crucial status during the flight can be recorded by Tandem receiver through a built-in black box module.

The configurable 10 channel ports are a key feature of TD R10, each channel port can be assigned as PWM, SBUS, PPM, or S-Pot. With the PPM protocol, the Tandem series receivers can open up the possibility of seamlessly working with multiple telemetry devices (Horus ESC, Advance sensors, etc.) as well as simplifying the build setup.
