June 2013 Physics 6pnpaper:

Bihar and Mithila J. Albert Rorabacher, 2016-09-13 The struggling states of Bihar and Mithila serve as extreme examples of India's problems. Development here has been thwarted by a hereditary landed aristocracy supported by religion, casteism, custom, social stratification, tradition, and patterns of behaviour that can be traced back millennia. In turn, all these have been masterfully manipulated by co-opted politicians who have turned politics into a veritable art form, as this volume comprehensively demonstrates. Please note: Taylor Francis does not sell or distribute the Hardback in India, Pakistan, Afghanistan, Nepal, Bhutan, Bangladesh, and Sri Lanka.

Fundamental Controls on Fluid Flow in Carbonates S.M. Agar, S. Geiger, 2015-02-02 This volume highlights key challenges for fluid flow prediction in carbonate reservoirs, the approaches currently employed to address these challenges, and developments in fundamental science and technology. The papers span methods and case studies that highlight workflows and emerging technologies in the fields of geology, geophysics, petrophysics, reservoir modelling, and computer science. Topics include detailed pore scale studies that explore fundamental processes and applications of imaging and flow modelling at the pore scale; case studies of diagenetic processes with complementary perspectives from reactive transport modelling; novel methods for rock typing; petrophysical studies that investigate the impact of diagenesis and fault rock properties on acoustic signatures; mechanical modelling and seismic imaging of faults in carbonate rocks; modelling geological influences on seismic anisotropy; novel approaches to geological modelling methods to represent key geological details in reservoir simulations; and advances in computer visualization, analytics, and interactions for geoscience and engineering.
