Bibliografía española, 2003 Lingüística del castellano chileno / Chilean Spanish Linguistics Brandon M. A. Rogers, Mauricio A. Figueroa Candia, 2021-09-07 Ya desde el siglo XIX el castellano chileno generó interés en lingüistas como Lenz 1891 quien lo aclamó como un geolecto dinámico y en constante evolución. Más recientemente un grupo importante de lingüistas contemporáneos ha indicado que existe una gran cantidad de diferencias entre el castellano de Chile y otras variedades en varios frentes lingüísticos tanto es así que deberá considerarse como una zona dialectal independiente en el mundo hispanohablante. Su interés como caso práctico se ve reforzado por la incongruencia del grado particularmente alto de variación social y el menor grado de su variación geográfica. Lingüística del castellano chileno. Estudios sobre variación, innovación, contacto e identidad es el primer volumen de su tipo y reúne el trabajo de un grupo diverso e internacional de investigadores e investigadoras del castellano de Chile. Mediante el uso de métodos teorizaciones y análisis lingüísticos actuales este volumen examina cómo el uso, la variación, las actitudes, la identidad y el cambio lingüístico se manifiestan de manera única en diferentes aspectos del castellano chileno y sus hablantes. Este volumen que acerca el trabajo más actual sobre la lingüística española de Chile a la vanguardia del campo constituye un recurso valioso para aquellos involucrados en la investigación y la enseñanza de la lingüística, la variación y el cambio lingüístico del castellano así como para estudiantes de grado y posgrado. As early as the 19th century Chilean Spanish attracted the interest of linguists such as Lenz 1891 who hailed it as an evolving and vibrant variety. In more recent times a number of contemporary linguists have

indicated that such a variety of differences exist between Chilean Spanish and other varieties on a number of linguistic fronts that it should be considered as an independent dialectal zone in the Spanish speaking world Its interest as a case study is reinforced further by the incongruence of the particularly high degree of social variation and the small degree of geographical variation Chilean Spanish Linguistics Studies on variation innovation contact and identity is the first of its kind bringing together the work of a diverse and international group of researchers on Chilean Spanish Through the use of current linguistic methods theorization and analyses this volume examines how language usage variation attitudes identity and change are uniquely manifested in different aspects of Chilean Spanish and its speakers Bringing the most current work on Chilean Spanish linguistics to the forefront of the field this volume will be a valuable resource to all involved in the research and teaching of Spanish language linguistics language variation and change as well as undergraduate and graduate students alike

Metaphor Studies: Theories, Methods, Approaches, and Future Perspectives Ilaria Rizzato, Valentina Cuccio,Aletta Gesina Dorst,2024-12-12 Metaphor has been studied as a linguistic conceptual and communicative phenomenon in a wide range of disciplines including linguistics literary studies

philosophy education political science media studies communication science psychology and neurosciences While the Cognitive Theory of Metaphor has dominated the field since the cognitive turn in the 1980s alternatives have been proposed including the Neural Theory of Metaphor the Relevance Theory Approach the Complex Systems Approach and the Dynamic Systems Approach Though studies are still often text based there is a growing body of research on visual metaphor multimodal metaphor and gestural metaphor as well as experimental research ranging from studies on metaphor processing and comprehension to studies in NLP and machine learning Metaphor Studies is thus a highly interdisciplinary field that encompasses a myriad of theories approaches and methods In current metaphor research each of these strands is facing new challenges and offering new venues of cutting edge research using state of the art technologies Researchers tend to focus on their own research areas and provide in depth views within the scope of their own disciplines Metaphor Studies do not seem to escape this phenomenon in spite of the large number of disciplines they draw on ranging from linguistics to psychology to the theory of science Hence there seem to be little cooperation and communication across different fields methods and approaches having metaphors and figurative language as their main object of investigation This Research Topic aims to promote cross fertilization among the many research areas involved in Metaphor Studies thus bringing together different methods and perspectives and offering a comprehensive overview of the possible research scenarios
