## January 20 thresholds Statistics Mei:

Boundaries of Competence Gwynne Nettler, 2017-12-02 The term social science promises more than its practitioners can deliver it promises knowledge This knowledge is to consist of statements of empirical regularities of such quality as will enhance predictive power and inform public and private policy Boundaries of Competence illuminates obstacles to this aspiration Chapter 1 grounds knowledge in perception Chapter 2 challenges the assumption that ordinary language necessarily describes reality and reveals the mischief words can do Chapter 3 proposes a continuum of perceiving conceiving involved in different ways of knowing worlds Chapter 4 lays out requirements of measurement arguing that assigning numbers to dubious observations gives false assurance that mathematical manipulations necessarily represent events Chapter 5 shows how choice of unit affects the correlations we find in our search for causes Chapter 6 holds that given deficiencies in knowledge and perhaps because of the way Nature works we assess probabilities rather than seek certainties Chapter 7 notes difficulties in counting events that consist of social facts which depend on us and those that refer to brute facts that exist independently of us Chapter 8 criticizes the practice of employing proxies for observations of what we are talking about In particular it demonstrates the error produced by relying on what people say as measure of what they do Chapter 9 criticizes ways of explaining conduct by characterizing actors and their acts and by understanding them through empathy Chapter 10 discusses the important and never ending quarrel about causation Chapters 11 and 12 argue that in social affairs decision is regularly torn between doing what is effective rational and doing what is right moral Nettler's writing is crisp and his argument balanced He employs research from several disciplines to challenge ideologically driven descriptions of our condition and explanations of our

**Fuzzy boundaries: Ambiguity in speech production and comprehension** Christopher Carignan, Georgia Zellou, Eleanor Chodroff, Joseph V. Casillas, 2023-04-20 Hollywood is Everywhere Melis Behlil, 2025-10-01 Hollywood has a long tradition of bringing in emigre directors from around the world dating back to the silent era Today as the film industry is ever more global the people who make blockbuster movies seemingly reflect this tradition hailing from many countries across the world But that fact hides a fundamental difference one that Melis Behlil examines in Hollywood is Everywhere today's Hollywood studios are themselves transnational with ownership structures and financial arrangements that stretch far beyond the borders of the United States Seen in that context today's international directors are less analogous to the emigre talent of the past than to ordinary transnational employees of other major global corporations *The Resilient City in World War II* Simo Laakkonen, J. R. McNeill, Richard P. Tucker, Timo Vuorisalo, 2019-05-27 The fate of towns and cities stands at the center of the environmental history of World War II Broad swaths of cityscapes were destroyed by the bombing of targets such as transport hubs electrical grids and industrial districts and across Europe Asia and the Americas urban environments were transformed by the massive mobilization of human and natural resources to support the conflict But at the same time the war saw remarkable resilience

among the human and non human residents of cities Foregrounding the concept of urban resilience this collection uncovers the creative survival strategies that city dwellers of all kinds turned to in the midst of environmental devastation As the first major study at the intersection of environmental urban and military history *The Resilient City in World War II* lays the groundwork for an improved understanding of rapid change in urban environments and how societies may adapt

*Federal Register*, 2013-12 *Other-Worldly* Mei Zhan, 2009-11-09 Traditional Chinese medicine is often portrayed as an enduring system of therapeutic knowledge that has become globalized in recent decades In *Other Worldly* Mei Zhan argues that the discourses and practices called traditional Chinese medicine are made through rather than prior to translocal encounters and entanglements Zhan spent a decade following practitioners teachers and advocates of Chinese medicine through clinics hospitals schools and grassroots organizations in Shanghai and the San Francisco Bay Area Drawing on that ethnographic research she demonstrates that the everyday practice of Chinese medicine is about much more than writing herbal prescriptions and inserting acupuncture needles Traditional Chinese medicine is also made and remade through efforts to create a preventive medicine for the proletariat world reinvent it for cosmopolitan middle class aspirations produce clinical miracles translate knowledge and authority and negotiate marketing strategies and medical ethics Whether

discussing the presentation of Chinese medicine at a health fair sponsored by a Silicon Valley corporation or how the inclusion of a traditional Chinese medicine clinic authenticates the California appeal of an upscale residential neighborhood in Shanghai Zhan emphasizes that unexpected encounters and interactions are not anomalies in the structure of Chinese medicine Instead they are constitutive of its irreducibly complex and open ended worlds Zhan proposes an ethnography of worlding as an analytic for engaging and illuminating emergent cultural processes such as those she describes Rather than taking cultural difference as the starting point for anthropological inquiries this analytic reveals how various terms of difference for example traditional Chinese and medicine are invented negotiated and deployed translocally Other Worldly is a theoretically innovative and ethnographically rich account of the worlding of Chinese medicine **Boreal Environment**

**Corporate Power and Human Rights** Manette Kaisershot,Nicholas Connolly,2018-02-02 There is ample evidence about the negative effects business activity of all types can have on the provision of human rights Equally there can be little doubt economic development usually driven through business activity and trade is necessary for any state to provide the institutions and infrastructure necessary to secure and provide human rights for their citizens The United Nations and businesses recognise this tension and are collaborating to effect change in business behaviours through voluntary initiatives such as the Global Compact and John Ruggie s Guiding Principles Yet voluntary approaches are evidently failing to prevent human rights violations and there are few alternatives in law for affected communities to seek justice This book seeks to robustly challenge the current status quo of business approaches to human rights in order to develop meaningful alternatives in an attempt to breach the gap between the realities of business and human rights and its discourse This book was
