Je Suis Charlie:

Lightness Catherine Meurisse, 2018-06-20 T00:00:00+02:00 In the aftermath of the murderous attack on the Charlie Hebdo offices on January 7 2015 cartoonist Catherine Meurisse struggles with the trauma of losing her friends and looks for a way to move forward with her life and her art She soon enters a dissociative state where she loses her memories especially those associated with esthetic experiences This leads her on a quest to seek beauty and lightness in the world around her with the help of guiding lights including Proust Stendhal Baudelaire and two provocative graffiti artists Throughout the book Meurisse uses her limber cartooning and dynamic writing to weave a tapestry of raw emotion and philosophical reflection laced with a strain of wry humor

Resilience Nicola Canessa, 2021-05-28 The Resilience publication is part of the outputs produced within the European project KAAU Knowledge Alliance for Advanced Urbanism www.kaau.net Erasmus program and consists of two volumes the first Resilience Intelligent Cities Resilient Landscapes offers reflections on the general framework and on the theme of resilience applied to intelligent cities and the landscape while the second volume GOA Resilient City analyses the case study of Genoa RESILIENCE is a combined word created by Manuel Gausa merging the words resilience and intelligence Intelligence is intended not only as the artificial but also as the human one though undoubtedly today the world of BigData and OpenData can help the better understand of the city and its dynamics Resilience instead is a term derived from the materials science and indicates the property that some materials have to maintain their structure or to regain its original shape after being subjected to crushing or deformation The history of making the city of Genoa safe from floods is ancient history And complex very complex It is the story of the wrong relationship between the river and the city between nature and the urban and industrial development of the capital between the flow of watercourses and their covering and cementing of the banks and beds of streams It is perhaps one of the paradigmatic examples of the senselessness of man's choices towards his environment But it is also the story of the delays of politics and institutions of bureaucracies of the system of public works in our country of an Italy more attentive to formal respect for rules than for the rules of nature In the midst of this history there are the disasters floods the dead the injured the damage of the flooding of the Bisagno torrent which with its 30 km cuts the city from north to south in one of the most built up areas of Italy to reach the sea in the Foce district
