Examination for Membership of the Royal College of General Practitioners (MRCGP) Royal College of General Practitioners,1990 **Internet Based Control Education 2001 (IBCE '01)** S. Dormido,F. Morilla,2002 The WWW has revolutionised educational institutions Control education is an area that has been enhanced through web developments an initiative to experiment and incorporate web based technologies led to the birth of Web Based Simulation WBS Control education is typically a domain where Web Based Simulation successfully shows its potential of how current technology can support the sharing of information amongst large dispersed groups This book is based around the proceedings of an IFAC meeting specifically devoted to Internet Based Control Education It provided a forum for discussions around issues such as remote labs virtual labs teleoperation centralized internet repository for control education internet based control systems materials and virtual reality in control education This book illuminates the most recent developments and advances in the use of the WWW in control education and presents many open issues for laboratory control education over the internet **The Objective Structured Clinical Examination** ,2001 **Annals** ,1995 **Proceedings** IEEE Computer Society,1998 This volume addresses topics including real time systems distributed system applications specification and verification distributed system analysis verification and analysis scheduling real time data organization and design Assessing the Portfolio Liz Hamp-Lyons,William Condon,1999 This volume deals with the subject of portfolio based writing assessment It explores the theory behind using portfolios in writing a programme as well as information about what portfolios are what advantages they hold for assessment purposes and what effects they can have on a writing programme *Books in Print Supplement* ,2002

Assessment, Learning and Employability Peter Knight,Mantz Yorke,2003 What is assessed gets attention what is not assessed does not When higher education is expected to promote complex achievements in subject disciplines and in terms of employability problems arise how are such achievements to be assessed In the first part Knight and Yorke argue that existing grading practices cannot cope with the expectations laid upon them while the potential of formative assessment for the support of learning is not fully realised Improving the effectiveness of assessment depends they claim on a well grounded appreciation of what assessment is and what may and may not be expected of it The second part is about summative judgements for high stakes purposes Using established measurement theory a view is developed of the conditions under which affordable useful valid and reliable summative judgements can be made A conclusion is that many complex achievements resist high stakes assessment which directs attention to low stakes essentially formative alternatives

Assessment for learning and employability demands more than module level changes to assessment methods The final part discusses how institutions need to respond in policy terms to the challenges that have been posed This book has wide and practical relevance to teachers module and programme leaders higher education managers and quality enhancement specialists **Books in Print** ,1991 **Forthcoming Books** Rose Arny,1992-10 **Whitaker's Books in Print** ,1998
