Medical Malpractice on Trial Paul C. Weiler, 1991 Medical malpractice has been at the center of recurring tort crises for the last quarter century In 1960 expenditures on medical liability insurance in the United States amounted to about 60 million In 1988 the figure topped 7 billion Physicians have responded not simply with expensive methods of defensive medicine but also with successful pressure upon state legislatures to cut back on the tort rights of seriously injured patients Various reforms have been proposed to deal with the successive crises but so far none have proved to be effective and fair In this landmark book Paul Weiler argues for a two part approach to the medical malpractice crisis First he proposes a thorough revision of the current tort liability regime which would concentrate available resources on meeting actual financial losses of seriously injured victims It would also shift the focus of tort liability from the individual doctor to the hospital or other health care organization This would elicit more effective quality assurance programs from the institutions that are in the best position to reduce our current unacceptable rate of physician induced injuries But in states such as New York Florida and Illinois where the current situation seems to have gone beyond the help of even drastic tort reform the preferred solution is a no fault system Weiler shows how such a system would provide more equitable compensation more effective prevention and more economical administration than any practical alternative *Pennsylvania Medical Malpractice* Clifford A.
